**Using Focus Groups to Listen, Learn, and Lead in Higher Education** Mona J.E. Danner, J. Worth Pickering, Tisha M. Paredes, 2023-07-03 Using Focus Groups to Listen Learn and Lead in Higher Education presents an easy to use 6 step guide to help leaders in higher education listen to and learn from their stakeholders in order to enhance decision making The big questions facing institutions today especially those surrounding access affordability and accountability require more than dashboards Metrics and quantitative data alone do not offer lasting solutions and improvements Using qualitative methods to listen to the voices of those involved especially students and staff is critical Focus groups constitute the most appropriate rigorous and relevant qualitative research tool for this purpose and one that is cost effective and builds community when conducted using the ODU Method described in this book Using Focus Groups is a single comprehensive and practical resource that describes why when and how to use focus groups The authors provide detailed guidance for using focus groups from developing the research questions with

stakeholders through training and recruiting moderators and identifying and recruiting participants to the logistics of conducting focus groups and ultimately analyzing data and developing final reports. Conversational vignettes illustrate the discussions that regularly occur in each step and help the reader better understand the process. Fifteen appendices provide templates and examples of every part of the process. Written particularly for institutional research and assessment staff and upper level administrators, this book will also appeal to deans, department and program chairs, and directors, faculty leaders, and administrative unit directors, including those in auxiliary and student services, alumni associations, and university foundations. It also serves as an excellent resource for higher education research methods courses. The authors are uniquely positioned to guide readers in this process. The team developed and refined this technique over two decades at Old Dominion University. They have conducted over 100 focus groups with campus, nonprofit, local, and international community organizations to assist them in assessing student learning, transition, and preparedness for the workforce, as well as evaluating organizations' work and planning future projects.

*Handbook of People Research: Deriving Value by Asking Questions* Francine Gemperle, 2019-01-17. You don't know enough about people. People grow and change constantly, impacted by the cultures they create and the global systems that surround them. Conducting People Research is an opportunity for students and professionals in creative, technical, and business fields to understand people and use that understanding to drive better outcomes. People Research is for anyone whose work is dependent on people as customers or constituents. It leverages the expertise of the humanities to drive innovation and value across industries. People Research starts with a mindset shift: get ready to ask questions and admit to what you don't know about people or where you've been just guessing. By developing an inquiry, working with some basic tools, and engaging with people, you will quickly gain insight about the situations they experience and identify new opportunities, setting direction for the future. This book is a guide to succeeding at People Research. Presented here is a basic framework for conducting research with people to inform design. This framework is focused on describing key decision points and thinking cues in the planning, engagement, analysis, and sharing of research. But this book doesn't simply describe a process; it's a handbook that includes worksheets, tools, and tips for people who plan to actually conduct people research for work or school. Throughout the book, readers can follow a sample project undertaken by a fictional team conducting research, creating insights, and finding some new product opportunities their company is positioned to fill. By doing research thoroughly and well, you position yourself and your organization to derive value from the effort and leverage it to make the right things in ways that serve people. This is a practical, hands-on guide that you will refer to again and again as you build experiences doing your own People Research. publisher's website
