Macroeconomic Methodology - A Post Keynesian Perspective -

Paper prepared for the Conference:
Debating Critical Realism

Roskilde University, 17-19 August 2001

[Macroeconomics is] a science of thinking in terms of models joined to the art of choosing models which are relevant to the contemporary world... because the material – to which it is applied – is, in too many respects, not homogenous through time...The object of a model is to segregate the semi-permanent or relative constant factors from those, which are transitory so as to develop a logical way of thinking of the latter. Keynes(1938), cw-xiv, p.296/7
