Money Illusion and Strategic Complementarity as Causes of Monetary Non-Neutrality Jean-Robert Tyran, 2012-12-06 In principle money illusion could explain the inertial adjustment of prices after changes of monetary policy Hence money illusion could provide an explanation of monetary non neutrality However this explanation has been thoroughly discredited in modern economics As a consequence economists have ever since the 1970s searched for alternative explanations for nominal rigidity These explanations are all based on the assumption of fully rational economic agents holding rational expectations This book argues that money illusion has been prematurely dismissed as an explanation of monetary non neutrality Methods of experimental economics are used to investigate the real aggregate effects of money illusion It is shown that money illusion in fact causes short run real income effects if strategic complementarity prevails Strategic complementarity is an important characteristic of naturally occurring macroeconomies and is a recurrent theme in most models explaining nominal rigidity

Macroeconomics Michael C. Burda, Charles Wyplosz, 2005 Building on the considerable success of previous editions this fourth edition of Macroeconomics has been further simplified to provide an accessible yet comprehensive analysis of modern macroeconomics within both a European and a global context Competing theoretical approaches are presented in a clear and balanced manner with continual reference to data and case study examples from the real world Burda and Wyplosz have produced another excellent textbook that will guide students through challenging and complex issues with enhanced clarity and simplicity Book jacket
