ten years have seen explosive growth in the technology available to the collision analyst changing the way reconstruction is
practiced in fundamental ways The greatest technological advances for the crash reconstruction community have come in the
realms of photogrammetry and digital media analysis The widespread use of scanning technology has facilitated the
implementation of powerful new tools to digitize forensic data create 3D models and visualize and analyze crash vehicles and
environments The introduction of unmanned aerial systems and standardization of crash data recorders to the crash
reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash
reconstruction Because of the technological changes occurring in the industry many SAE papers have been written to
address the validation and use of new tools for collision reconstruction Collision Reconstruction Methodologies Volumes 1 12
bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field Topics featured in
the series include Night Vision Study and Photogrammetry Vehicle Event Data Recorders Motorcycle Heavy Vehicle Bicycle
