

Vision Series

■ The PA281 is an extremely versatile wide-dispersion, low-profile, two-way loudspeaker system offering substantial power and value for a variety of professional applications that include primary sound reinforcement and supplementary fill for larger systems. Its compact size makes it ideal for low visibility column, side wall, or under balcony mounting.

■ The high-frequency section is a constant directivity horn loaded to a 1-inch compression driver with a 1.75-inch diaphragm assembly for smooth, wide dispersion. The low-frequency transducers are two 8-inch carbon fiber woofers suitable for difficult climatic environments.

■ The system includes a high-level crossover network that features markedly lower (than conventional) inductance values in series with the woofer. We call this innovation LICC (Low Impedance Compensated Crossover). The benefit is delay reduction, reduced phase shift and superior transient response. Dynamic high-frequency driver protection is accomplished with a fast-response filament resistor, chosen to complement the power curve of the driver.

■ The Mackie PA281 is a part of the ViSiON family of loudspeaker products including full-range, cost-effective two-way loudspeakers and complementary subwoofer cabinets. These enclosures have a trapezoidal foot-print for easy array configuration. All enclosures are constructed using 19 mm void-free, birch plywood and finished with a scratch-resistant black coating. Transducer components are protected from the environment by a heavy gauge metal grille. The ViSiON products are eminently suited for fixed installation, ready for suspension via built-in M10 inserts with metal reinforcement and forged shoulder eyebolt hardware. The PA281 also includes M8 inserts.

■ This Mackie product is covered by an exclusive, one-time, NO FAULT repair policy in addition to a five year limited warranty.
