

The background of the book cover features a composite image. At the top, a globe is shown with a dark blue landmass map. Below the globe, a line graph is plotted on a grid, with a thick black line showing fluctuations. To the right of the graph, a portion of a silver calculator is visible. A silver pen with a gold-colored tip lies diagonally across the bottom right of the grid. A dark blue horizontal band is superimposed over the middle of the image, containing the title and author information.

**Macroeconomics, Third Edition** David G. Tuerck, 2021-02-01 This book brings these theories together under one methodological roof where the choices made by economic agents depend on their varying perceptions of the economic constraints they face combining new classical principles under which the economy operates at full employment with theories that allow for extended periods of underemployment brought about by mixed signals from workers and employers The task of macroeconomics is to provide the tools for understanding the performance of the aggregate economy as measured by production employment inflation and other economic indicators Most books on this topic compare different theories of macroeconomic performance under alternative assumptions about how individual consumers workers and investors adjust to the economic environment in which they find themselves This book brings these theories together under one methodological roof where the choices made by economic agents depend on their varying perceptions of the economic constraints they face combining new classical principles under which the economy operates at full employment with theories that allow for extended periods of underemployment brought about by mixed signals from workers and employers The book takes up modern monetary theory and its bearing on the massive deficits run up by the federal government over the ongoing corona contraction and the earlier great contraction The author also reviews the policy interventions undertaken by the federal government during these contractions with a view toward assessing their effectiveness
