Essays in Economics: Macroeconomic analyzes and perspectives of economic thought Muhammad Mustafa

Rashid, 2022-06-28 Chapter 1 The purpose of this chapter is to provide insights into how the proliferation of globalization has impacted labor markets both in advanced industrialized nations and well as developing nations Insightful analysis will be drawn from Oatley 2011 on division of labor Jaumotte Tytell 2007 on labor compensation Hahn Narjoko 2013 on the impact on South Asian Countries Basu 2016 on wage as a share of GDP and Wallace Gauchat Fullerton 2011 on the impact of globalization and labor markets on inequality Chapter 2 Building on the system of reason provided for by the Greek philosopher and specifically Aristotle St Thomas Aquinas built a comprehensive system and theory of natural law which has lasted through the ages The theory was further developed in the Middle Ages and in the Enlightenment Ages by many a prominent philosopher and economist and has been recognized in the Modern Age The natural law theory and system has been repeatedly applied to the spheres of economic thought and has produced many lasting contributions such as private property rights and individual rights In recent times with the collapses of the financial system and rapid globalization there has been a renewed interest in the application of natural law theory to economics to counter a certain anthropology and distortion of values created by a modern economic system of self preservation deriving its insights from the philosophies of Thomas Hobbes and Niccolo Machiavelli Chapter 3 The credit crises experienced in the US in year 2008 is labeled as perhaps the most significant crises since the great depression The roots of the crises were found in the default of the sub prime mortgages and the failure occurred in both the US and the UK Due to the integrated nature of international financial systems the spillover impacted many countries as the economies in Asia and Europe were purchasers of the sub prime mortgages that originated in both UK and US The impact of the credit crises in Canada is of unique importance due to the close proximity to US and both the US and Canada being of great strategic importance to each other as well as one of the largest trading partners Even though the international financial credit crises adversely impacted many countries the evidence that has come across recent years point towards the conclusion that Canada was able to weather the crises much better than many other countries
