ESSAY. Write your answer in the space provided or on a separate sheet of paper.

- 1) Define macroeconomics and provide two key concerns it studies.

*Answer:* Macroeconomics studies the behaviour of an economy as a whole. It focuses its studies upon two key concerns: (1) long-run economic growth, and (2) short-run fluctuations in output and employment (the business cycle).

- 2) What three key statistics do macroeconomists study to assess the health of the economy? Give a short explanation of each.

*Answer:* Macroeconomists study real gross domestic product (GDP), unemployment, and inflation. Real GDP measures the annual output of final goods and services by an economy after adjusting for price changes. Unemployment is a measure of the number of people who are not able to find work despite actively looking for it. Inflation is the increase in the general (or overall) price level.

- 3) What is the difference between nominal and real GDP?

*Answer:* The GDP measures all final goods and services produced in an economy in a year. The problem is, you cannot add apples to typing services and then to movies produced and come up with a meaningful value. As a solution economists add the dollar value of each final good and service. When final goods and services are measured in current prices, we call this the nominal GDP. Real GDP measures output after accounting for year-to-year price changes. This makes it possible to compare quantity changes between years.

- 4) Why do economists measure growth in an economy using real GDP rather than nominal GDP?

*Answer:* Nominal GDP measures the final dollar value of all goods and services produced in an economy in a year. This measurement is made using current dollars. Growth in nominal GDP can occur for three reasons: (1) more goods and services are produced, (2) goods and services have higher prices, and (3) there is an increase in both goods and services produced and their associated prices. Real GDP is measured in constant dollars, so an increase in real GDP simply measures an increase in the production of goods and services.

McConnell and Brue's *Macroeconomics Principles Problems and Policies* is the leading *Principles of Macroeconomics* textbook because it is innovative and teaches students in a clear unbiased way. The 17th Edition builds upon the tradition of leadership by sticking to 3 main goals: help the beginning student master the principles essential for understanding the economizing problem, specific economic issues, and the policy alternatives; help the student understand and apply the economic perspective and reason accurately and objectively about economic matters; and promote a lasting student interest in economics and the economy. *Macroeconomics* Campbell R. McConnell, Stanley L. Brue, 1996. Known for clarity, patience, balance, and step by step presentation of difficult topics, *Macroeconomics* has defined excellence among textbooks. In the new edition of *Macroeconomics*, the authors have continued to consolidate material, keeping the text among the shortest available, while focusing on three primary areas of change: a comprehensive restructuring of the presentation of macroeconomics, internationalization, and thorough updating of the presentation and the addition of new pedagogical features to help students get the most from every chapter.      **Test bank one to accompany Macroeconomics** Campbell R.
