Zumbo, Anita M. Hubley, 2017-05-23 This volume addresses an urgent need across multiple disciplines to broaden our understanding and use of response processes evidence of test validity It builds on the themes and findings of the volume Validity and Validation in Social Behavioral and Health Sciences Zumbo Chan 2014 with a focus on measurement validity evidence based on response processes Approximately 1000 studies are published each year examining the validity of

inferences made from tests and measures in the social behavioural and health sciences. The widely accepted Standards for Educational and Psychological Testing 1999 2014 present five sources of evidence for validity content related response processes internal structure relationships with other variables and consequences of testing Many studies focus on internal structure and relationships with other variables sources of evidence which have a long history in validation research known methodologies and numerous exemplars in the literature Far less is understood by test users and researchers conducting validation work about how to think about and apply new and emerging sources of validity evidence. This groundbreaking volume is the first to present conceptual models of response processes methodological issues that arise in gathering response processes evidence as well as applications and exemplars for providing response processes evidence in validation work
