

# Manual de Facebook (I): Primeros pasos

17 de Abril por **Fabrizio Ferri**

Nivel Básico. Internet. Tutoriales. Web

En muy poco tiempo, Facebook se ha vuelto una herramienta de comunicación tan importante como el correo electrónico o el chat. Con un diseño a medio camino entre una bitácora y una tarjeta de visita virtual, esta red social cuenta ya con 200 millones de usuarios en todo el mundo.

Darse de alta en Facebook es fácil, pero ocurre que los perfiles se abandonan por no saber exactamente qué hacer con ellos. En esta serie de entregas iremos ilustrando lo esencial para que disfrutes de Facebook desde el primer momento.

Empezamos por lo básico: darte de alta y conectar con los demás.

Hay muchas formas de llegar a Facebook. Tal vez recibiste el correo de algún conocido, o hayas oído hablar de esta red social mientras tomabas una cerveza; quizá sólo quieras curiosar en los perfiles de tus amigos. Sea como sea, el proceso de alta siempre es el mismo, y pasa por introducir tus datos en un breve formulario.

Por raro que parezca, no vale introducir cualquier nombre o apellido. Facebook filtra los que en su opinión son ficticios y, en ese caso, te impide proseguir el alta hasta que los cambies. Lo que puede parecer un obstáculo a tu libertad tiene por objetivo el conseguir una comunidad de calidad y con

personas reales. De todas formas, el filtro no es perfecto, y con un poco de empeño puede saltarse.

**Peter B.M.J. Pijpers**

## Manual De Facebook 201:

Influence Operations in Cyberspace and the Applicability of International Law Peter B.M.J. Pijpers,2023-07-01 This enlightening book examines the use of online influence operations by foreign actors and the extent to which these violate international law It looks at key recent examples such as the 2016 UK EU Referendum the 2016 American Presidential Election and the 2017 French Presidential Election The book analyses the core elements of interventions and sovereignty and the extent to which these elements were violated in the three central case studies **The Threefold Logic of Advanced Architecture** Manuel Gausa,Jordi Vivaldi,2021-04-15 During the last 30 years Advanced Architecture has consolidated an interactive and informational logic that differs from that of Modernity and Postmodernity This logic is threefold it is modulated through three coexisting protocols modes of action whose peaks of intensity occur in three different decades Conformative Protocols 1990 2000 Distributive Protocols 2000 2010 and Expansive Protocols 2010 2020 This work proposes a threefold cultural narrative whose interactive and informational logic differs from that of modernity and postmodernity It positions three different ethos by critically approaching the architectural side of a cultural mutation that has been affecting the Western experimental areas of knowledge and practice since the end of the last century A transformative process constituted by a constellation of transdisciplinary manifestations accelerations turns shortcuts and clusterizations that by no means can be read under one single epistemological umbrella In this sense rather than approaching the practice of architecture focusing on its disciplinary inner specificity this book approaches the research of experimental architecture focusing on its extra disciplinary entanglements It argues that a vast multiplicity of fields of knowledge participates in a cultural endeavour modulated through three protocols forms of action that singularize three decades Conformative Protocols 1990 2000 Distributive Protocols 2000 2010 and Expansive Protocols 2010 2020 These three periods shouldn t be read as three hermetic and concatenated monades but as three different modulations of the same narrative that is as three overlapping and coexisting systems whose peaks of intensity occur in three different decades However the main purpose of this book is not limited to unveiling the ethos of these three conjugations It also aims at using this framework as a time field a narrative map that moves from the classificatory to the cartographical in order to vectorize the last 30 years of experimental architecture In this sense this book argues that this threefold set of protocols represents the progressive attempt to constitute critical interiorities looking for and produced through interactions that are increasingly more intimate and whose agents are increasingly more diverse A tendency oriented towards the consolidation of an intimacy between strangers that highly resonates with the cultural and technological landscape in which experimental architecture operates **The Ethics Police?** Robert Klitzman,2015-03-16 Research on human beings saves countless lives but has at times harmed the participants To what degree then should government regulate science and how The horrors of Nazi concentration camp experiments and the egregious Tuskegee syphilis study led the US government in 1974 to establish Research Ethics

Committees known as Institutional Review Boards IRBs to oversee research on humans The US now has over 4 000 IRBs which examine yearly tens of billions of dollars of research all studies on people involving diseases from cancer to autism and behavior Yet ethical violations persist At the same time critics have increasingly attacked these committees for delaying or blocking important studies Partly science is changing and the current system has not kept up Since the regulations were first conceived 40 years ago research has burgeoned 30 fold Studies often now include not a single university but multiple institutions and 40 separate IRBs thus need to approve a single project One committee might approve a study quickly while others require major changes altering the scientific design and making the comparison of data between sites difficult Crucial dilemmas thus emerge of whether the current system should be changed and if so how Yet we must first understand the status quo to know how to improve it Unfortunately these committees operate behind closed doors and have received relatively little in depth investigation Robert Klitzman thus interviewed 45 IRB leaders and members about how they make decisions What he heard consistently surprised him This book reveals what Klitzman learned providing rare glimpses into the conflicts and complexities these individuals face defining science assessing possible future risks and benefits of studies and deciding how much to trust researchers illuminating more broadly how we view and interpret ethics in our lives today and perceive and use power These committees reflect many of the most vital tensions of our time concerning science and human values individual freedom government control and industry greed Ultimately as patients scientists or subjects the decisions of these men and women affect us all
