The Paradox Planet Larry Light, Joan Kiddon, 2017-07-18 Beginning with the Age of We in the 1950s and moving to the Age of Me to today, the Age of I. This book examines how polarization and anger has changed how companies must manage their brands. Larry Light and Joan Kiddon, the leaders of Arcature LLC, consultants in brand management, examine societal changes and global, local and personal forces through the lens of marketers. They explain how to leverage paradox promises into brand focused strategies and actions that create a pathway to profitability, create extraordinary brand experiences for individuals and communities and build strong brands in a world of contradictory needs and benefits. In today's world, people want their individuality to be recognized but they also want to belong to a group that shares their distinctiveness. People want to be independent and interconnected, which is the underlying paradox affecting how we make decisions today. Navigate how to satisfy conflicting needs and look beyond single minded solutions with the insights and guidance in *The Paradox Planet*.

Responsible Business Olaf Dilling, Martin Herberg, Gerd Winter, 2008-07-01 With the globalisation of markets, the

phenomenon of market failure has also been globalised Against the backdrop of the territoriality of nation state jurisdictions and the slow progress of international law based on the principle of sovereignty this poses a serious challenge However while the legal infrastructure of globalised markets has a firm basis in formal national and international law the side effects of economic transactions on public goods such as the environment human health and consumer interests often escape state based regulation Therefore attention is drawn to the potential of self regulation by transnational industry While hypotheses abound which try to grasp this phenomenon in conceptual terms both empirical and legal research is still underdeveloped This volume helps to fill this gap in two ways firstly by reconstructing self regulatory settings such as multinational corporations transnational production networks and industry NGO partnerships in terms of organisation problem solving and legitimation and secondly by linking their empirical findings to formal law by examining how legal concepts are reflected in self regulation how the law builds on self regulatory solutions and how it helps to establish favorable conditions for private governance
