Pieces of Me Veronica Neave, 2009-10-01 A vibrant performer film director and mum life for Veronica Neave was always a little crazy and unpredictable When she tested positive for the BRCA2 breast cancer gene the turmoil in her life reached a new high The genetic test combined with her family s history increased the probability of Veronica one day battling breast cancer to more than 85% Veronica had watched her mother s ongoing struggle and knew well the history of other relatives dying young at the hands of this persistent disease When Veronica s two sisters also tested positive for the gene it seemed the deadly pattern was destined to continue Veronica s options on paper seemed simple prevention through high maintenance testing medication or the more intrusive step of removing her healthy breasts and possibly her ovaries too in the hope of prevention With her breasts now centre stage the decision was extremely personal and introspective and yet also seemed to be everybody s business As she unravelled the information of experts from across the medical spectrum and views from others Veronica battled her own beliefs about sexuality body image and even the thought that her breast removal and reconstruction would be seen as a cosmetic improvement by many not as a life saving operation One thing was certain The science of genetic identification was expanding faster than cures or treatments and Veronica needed to make a decision now On one hand she had been forewarned of the potential risks on the other there was no certainty of prevention or a cure Veronica confides It s strange Until a few years ago my family had never heard of the BRCA2 gene and now it seems to be everywhere It s a bizarre predicament to be in dealing with the concept that you may have cancer but not yet and to be

making decisions on a future that may or may not happen but could kill you I was screaming out for someone to tell me what to do I was so confused and wondering just how much time I really had before fate took the decision out of my hands Pieces of Me is a beautifully written informative and thought provoking account of Veronica s journey from initial diagnosis with the BRCA2 gene mutation to her decision to remove her healthy breasts It s a topic guaranteed to divide any dinner party Along the way she shares her choices insights and fears as she untangles the different perspectives and advice to eventually find her own way My mother consciously always talked to us of death so we would not be afraid She said she did this because she knew the history of cancer in our family was more than just a coincidence My great grandmother my great aunt and my grandmother all died of breast cancer by the time they were 50 years old My mother developed breast cancer at 49 and her sister a little later at age 59 Needless to say while growing up there was a shadow of awareness that breast cancer was in my genes Veronica Neave *Sons of the Empire.
