Young Adult Literature: From Romance to Realism, Third Edition Michael Cart, 2017-11-21 **Mars Adapting** Francis Hoffman, 2021-03-15 As Clausewitz observed In war more than anywhere else things do not turn out as we expect The essence of war is a competitive reciprocal relationship with an adversary Commanders and institutional leaders must recognize shortfalls and resolve gaps rapidly in the middle of the fog of war The side that reacts best and absorbs faster increases its chances of winning Mars Adapting examines what makes some military organizations better at this contest than others It explores the institutional characteristics or attributes at play in learning quickly Adaptation requires a dynamic process of acquiring knowledge the utilization of that knowledge to alter a unit's skills and the sharing of that learning to other units to integrate and institutionalize better operational practice Mars Adapting explores the internal institutional factors that promote and enable military adaptation It employs four cases drawing upon one from each of the U S armed services Each case was an extensive campaign with several cycles of action counteraction In each case the military institution entered the war with an existing mental model of the war they expected to fight For example the U S Navy prepared for decades to defeat the Japanese Imperial Navy and had developed carrier based aviation Other capabilities particularly the Fleet submarine were applied as a major adaptation The author establishes a theory called Organizational Learning Capacity that captures the transition of experience and knowledge from individuals into larger and higher levels of each military service through four major steps The learning change cycle is influenced he argues by four institutional attributes leadership organizational culture learning mechanisms and dissemination mechanisms The dynamic interplay of these institutional enablers shaped their ability to perceive and change appropriately **The Oxford Handbook of the Word** John R.
