Makerere Postgraduate Admission List:

African Dynamics in a Multipolar World, 2013-05-16 Fifty years after the foundation of the OAU and the consolidation of most African states and institutions the international panorama and Africa's position in it have changed considerably. The world's geopolitical and economic configuration has evolved with new actors appearing in a new period of globalization. In tune with ECAS 2013 this volume proposes that the experiences appearing in Africa question dominant paradigms in terms of political practice and academic reflection and thus offer a clear challenge to the academic community. The volume offers clues to answer questions such as: What is the impact of the current processes of globalization for African countries and African citizens? How should African Studies be engaged to gauge African dynamics both at a local and global level? What interdisciplinary means and tools should be brought in to produce an epistemologically relevant view or narrative of the issues under analysis?

Scholars in the Marketplace. The Dilemmas of Neo-Liberal Reform at Makerere University, 1989-2005 Mahmood Mamdani, 2007. *Scholars in the Marketplace* is a case study of market based reforms at Uganda's Makerere University. With the World Bank heralding neoliberal reform at Makerere as the model for the transformation of higher education in Africa it has implications for the whole continent. At the global level the Makerere case exemplifies the fate of public universities in a market oriented and capital friendly era. The Makerere reform began in the 1990s and was based on the premise that higher education is more of a private than a public good. Instead of pitting the public against the private and the state against the market this book shifts the terms of the debate toward a third alternative than explores different relations between the two. The book distinguishes between privatisation and commercialisation two processes that drove the Makerere reform. It argues that whereas privatisation the entry of privately sponsored students is compatible with a public university where priorities are publicly set commercialisation financial and administrative autonomy for each faculty to design a market responsive curriculum inevitably leads to a market determination of priorities in a public university. The book warns against commercialisation of public universities as the subversion of public institutions for private purposes.
