Accounting for Value in Marx's Capital Robert

Bryer, 2017-09-07 Many scholars discuss Marx's Capital from many perspectives but Accounting for Value uniquely advances and defends an accounting interpretation of his theory of value that he used it to explain capitalists accounts It confirms and builds on the Temporal Single System Interpretation's refutation of the charge that Marx's illustration of the transformation from values to prices is inconsistent and its defense of his Law of the Tendency of the Rate of Profit It rejects other interpretations by showing that only a temporal single system interpretation is consistent with Marx's accounting The book shows that Marx became seriously interested in accounts from the late 1850s during an important period in the development of his critique of political economy asking Engels for information and explanations Examining their letters in the context of Marx's evolving work it argues supports the hypothesis that discovering he could explain them with his theory of value gave him the breakthrough he needed to decide how to present his work and explains why in 1862 he decided to change its title to Capital Marx's explanations of capitalist accounting it concludes amount to an accounting theory that explains how individual capitalists and the capital market use what is for many the invisible hand of accounting to control the production and distribution of surplus value Marx claimed his theory of value was a work of science a critique of political economy that would deliver a theoretical blow from which the bourgeoisie would never recover He failed critics argue because his critique depends on hypothetical entities which we cannot directly observe such as value and abstract labour surplus value which means his theory is not open to empirical refutation The book however argues that he used his theory of value to explain the phenomenal forms of profit rate of profit etc by explaining the observable accounting principles and practices capitalists use to calculate and control them in which as he said we can glimpse the determination of value by socially necessary labor time which experience could have refuted

Subject Guide to Books in Print, 1996 **Forest Science**, 2013 **Creating The "Big Mess": A Marxist History Of American Accounting Theory, C.1900-1929** Rob Bryer, 2021-07-15 Creating the Big Mess and its sequel Accounting for Crises use Marx's theory of capitalism to explain why there is no generally accepted theory of financial accounting and explore the consequences by studying the history of American accounting theory from c 1900 to 2007 The answer Creating

the Big Mess is first that while late 19th century British accounting principles founded on the going concern concept provided an objective basis for holding management accountable to shareholders for its stewardship of capital and were accepted by the nascent American profession they are inchoate Second Irving Fisher's economic theory of accounting based on the assertion that present value is the accountants measurement ideal which is subjective framed early 20th century American accounting theory which undermined British principles making them incoherent In an unregulated pro business environment leading theorists particularly Henry Rand Hatfield and William A Paton Jr became authorities for management discretion creating the big mess Hatfield saw in late 1920s American accounting Accounting for Crises examines the roles of Fisher's theory in promoting the speculation leading to the 1929 Great Crash aggravating the Great Depression hindering accounting regulation from the 1930s producing the Financial Accounting Standard Board's conceptual framework and facilitating the 2007 2008 Global Financial Crisis **Books in Print** ,1991 **Cost and Management Accounting** Colin Drury,2003 **Management and Cost Accounting. 7th Ed** Colin Drury,2008
