Management Control Systems, Decision-Making, and Innovation Development Dawid Szutowski, 2021-10-03 The systematic approach to innovation development today is one of the world's most prominent scientific fields and with good reason. When applied correctly, such a system produces regular outcomes which consistently drive lasting competitive advantage. Unfortunately, as much as it is beneficial, the orchestration of an undisturbed flow of multiple complex dynamic and flexible innovation development processes is structurally demanding. In this book, a recognised innovation management specialist sets the record straight, offering a comprehensive approach to the improvement of innovation efficiency with the use of a management control system. Unlike other books on the subject, it proposes original representation of the CDI model of the relationships between management control system, decision making, quality and innovation system efficiency and explains why management control is fundamental to innovation management. In addition to that, inside the reader will find several original developments. These include the info deficiency I-D model depicting the various parameters hindering decision making in innovation development, the product innovation development PID system offering the original function-based approach to innovation management and the composite innovation index, specially designed tool intended to evaluate the efficiency of an innovation development system. It will be of interest to researchers, academics, practitioners and advanced students in the fields of management strategy and innovation. Integrated Power Of Management Control Systems In Japan Eri Yokota, 2025-04-11 The management control framework that originated in large scale manufacturing oriented industries has now expanded its scope in a variety of ways. It has expanded from a focus on manufacturing companies to service companies, non-profit companies and so on. The target group for applying the framework has also broadened from managers to employees. The framework is also examined in terms of how it should be applied to promote sustainability in companies. In this book, Japanese researchers discuss the situations in which management control, a tool born in Europe and the US, is utilized in Japan. Specifically, the book focuses on various types of management control systems from manufacturing companies, innovation companies, service companies to non-profit companies and explains the characteristics of these systems based on Japanese organizations. Readers of this book will understand how Japanese researchers are using the management control framework in the context of diversification and from there, the application of the framework in Japanese organizations.
