Making Global Health Care Innovation Work N. Engel, I. Van Hoyweghen, A. Krumeich, Ine Van Hoyweghen, 2014-10-23

Global Health involves among many things the intensified travelling of people resources technologies knowledge standards and ideas This book describes what happens when innovations are transferred to new settings What work is needed to make them work but also how they change the setting into which they are introduced **Compound Solutions** Susan

Craddock, 2017-02-21 Claiming 1.5 million lives in 2015 tuberculosis is the world's most deadly infectious disease Because of the population it overwhelmingly affects however pharmaceutical companies are uninterested in developing better drugs for the disease *Compound Solutions* examines Product Development Partnerships (PDPs) which arose early in the twenty-first century to develop new drugs and vaccines for infectious diseases in low-income countries Here for the first time is a sustained examination of PDPs the work they do the partnerships they form their mission and their underlying philosophy of addressing global health needs with implications that extend well beyond tuberculosis Focusing on two PDPs for tuberculosis the Global Alliance for TB Drug Development (TB Alliance) and Aeras a nonprofit focused on vaccine development Susan Craddock argues that PDPs do much more than product development As innovative sites of humanitarian pharmaceutical production they are contravening mainstream pharmaceutical production by tying drug and vaccine research to global health needs rather than shareholder demand In largely untethering the profit incentive from pharmaceutical production Craddock shows PDPs exhibit more creative and efficient scientific practices reshaping regulatory norms and implementing more ethical forms of clinical trials that enhance community engagement and capacity building An unparalleled interdisciplinary analysis of PDPs as politically socially scientifically and economically innovative sites of pharmaceutical production *Compound Solutions* is a must for readers in the fields of public health science and technology studies and medical social science
