Making Modern World Materials Dematerialization:

SUMMARY - Making The Modern World: Materials And Dematerialization By Vaclav Smil Shortcut Edition, Our summary is short simple and pragmatic It allows you to have the essential ideas of a big book in less than 30 minutes As you read this summary you will learn that the increased consumption of materials is the major feature of the modern world You will also learn that the invention of the steam engine revolutionized mankind a long term dematerialization without radical changes in lifestyle is very unlikely humanity s material progress is experiencing two successive ages energy is the most important of all materials our civilization is at a crossroads in terms of our consumption of materials the current level of material consumption is very recent if we place it in the long historical period The consumption of materials is at the heart of economic production without which it could not exist Materials of all kinds be they mineral vegetable etc condition our daily life modern life that of industrialized countries whose societies are consumer societies Their production use and destruction once they have become waste are the subject of this book which examines the costs of our society s dependence on materials as well as the possible paths to a progressive dematerialization which the threatened integrity of the biosphere makes indispensable Buy now the summary of this book for the modest price of a cup of coffee **Summary of Making the Modern World - [Review Keypoints and Take-aways]** PenZen Summaries,2022-11-28 The summary of Making the Modern World Materials and Dematerialization presented here include a short review of the book at the start followed by quick overview of main points and a list of important take aways at the end of the summary The Summary of The book Making the Modern World was published in 2014 and is a guide to the material consumption of humanity throughout history and into the future These ideas explain the most important material categories of our time and the ways in which we can successfully manage them moving forward Making the Modern World summary includes the key points and important takeaways from the book Making the Modern World by Vaclav Smil Disclaimer 1 This summary is meant to preview and not to substitute the original book 2 We recommend for in depth study purchase the excellent original book 3 In this summary key points are rewritten and recreated and no part text is directly taken or copied from original book 4 If original author publisher wants us to remove this summary please contact us at support mocktime com **The World in a Grain** Vince Beiser,2018-08-07 A finalist for the PEN E O Wilson Literary Science Writing Award The gripping story of the most important overlooked commodity in the world sand and the crucial role it plays in our lives After water and air sand is the natural resource that we consume more than any other even more than oil Every concrete building and paved road on Earth every computer screen and silicon chip is made from sand From Egypt s pyramids to the Hubble telescope from the world s tallest skyscraper to the sidewalk below it from Chartres stained glass windows to your iPhone sand shelters us empowers us engages us and inspires us It s the ingredient that makes possible our cities our science our lives and our future And incredibly we re running out of it The World in a Grain is the compelling true story of the hugely important and diminishing

natural resource that grows more essential every day and of the people who mine it sell it build with it and sometimes even kill for it It s also a provocative examination of the serious human and environmental costs incurred by our dependence on sand which has received little public attention Not all sand is created equal Some of the easiest sand to get to is the least useful Award winning journalist Vince Beiser delves deep into this world taking readers on a journey across the globe from the United States to remote corners of India China and Dubai to explain why sand is so crucial to modern life Along the way readers encounter world changing innovators island building entrepreneurs desert fighters and murderous sand pirates The result is an entertaining and eye opening work one that is both unexpected and involving rippling with fascinating detail and filled with surprising characters

Westlessness Samir Puri,2024-07-25 What if the sun truly is setting on the Western world s outsized influence over the rest of the planet In *Westlessness* former UK diplomat Dr Samir Puri vividly demonstrates how in demographic economic military and cultural terms we are hurtling into a far more diverse global future Many of our certainties about the present built on centuries of massive Western global impact are increasingly fragile Untold wealth is moving from the West to the East as nations like India and Indonesia are set to reach new heights of growth and confidence And China continues its ascent to the peak of the economic mountain but are cracks appearing And will the Western world under the aegis of US global military economic technological and cultural power give up its privileged position willingly Nothing is linear and nothing is predictable Are we prepared personally and professionally for a far more diverse global future Prepared or unprepared *Westlessness* is essential reading for us all

 Philip Zimmermann **Making the Modern World** Vaclav Smil, 2013-12-16 How much further should the affluent world
 push its material consumption Does relative dematerialization lead to absolute decline in demand for materials These and
 many other questions are discussed and answered in Making the Modern World Materials and Dematerialization Over the
 course of time the modern world has become dependent on unprecedented flows of materials Now even the most efficient
 production processes and the highest practical rates of recycling may not be enough to result in dematerialization rates that
 would be high enough to negate the rising demand for materials generated by continuing population growth and rising
 standards of living This book explores the costs of this dependence and the potential for substantial dematerialization of
 modern economies Making the Modern World Materials and Dematerialization considers the principal materials used
 throughout history from wood and stone through to metals alloys plastics and silicon describing their extraction and
 production as well as their dominant applications The evolving productivities of material extraction processing synthesis
 finishing and distribution and the energy costs and environmental impact of rising material consumption are examined in
 detail The book concludes with an outlook for the future discussing the prospects for dematerialization and potential
 constraints on materials This interdisciplinary text provides useful perspectives for readers with backgrounds including
 resource economics environmental studies energy analysis mineral geology industrial organization manufacturing and
