## How Management Accounting Information Supports Decision Making

---

### QUESTIONS

- 1-1** Management accounting is a discipline that designs planning and performance measurement systems, using financial and nonfinancial information, to help an organization develop and implement its strategy. The information must be relevant and helpful, and customized to serve multiple purposes, such as making decisions, allocating resources, and monitoring, evaluating, and rewarding performance. Information for the “plan” and “do” steps of the PDCA cycle includes prospective data on costs, profits, efficiency, and quality associated with alternative ways to produce or provide goods or services. Information for the “check” and “act” steps includes assessments of how well the organization is achieving its objectives. Common information requirements include measures of cost, quality, profitability, and timeliness.
- 1-2** A company’s operators, managers, and executives need information for their operational control and improvement activities, as well as on the performance of their individual processes, products, services, and customers. This information is important to direct managers’ attention to areas where improvement is needed, to provide feedback on activities, and to monitor and evaluate the performance of operators, departments, divisions, and business units and their managers. This information should be created and produced based on the internal need for operational and strategic information.

Shareholders and external suppliers of capital are not involved in managing the business or establishing and validating the company’s strategy. Therefore, they do not need the timely and disaggregate information generated for internal managerial uses. External capital suppliers will receive less timely (typically quarterly for shareholders, monthly for creditors) and more aggregate information. Also the form and accounting procedures used to prepare these external reports are constrained by regulation—such as by the country’s standard setting authorities and governmental regulatory agencies. This information may

## **Management Accounting 6e Solutions Ch 4:**

*Management Accounting* Professor Carsten Berkau, 2020-04-20 Management Accounting is written for students in international Business Management study programs. It covers the widely applied syllabus of Cost Accounting and Management Accounting at universities on bachelor's and master's level. The book is based on more than 20 years academic teaching experience in Germany and at international universities in South Africa, Malaysia, China, the Netherlands, and South Korea. In this text book, the application of methods and instruments comes first. Management Accounting follows a case study based approach. All cases are taken from previous exam papers and explained in detail. The text book starts with a case study of a manufacturing company and compares Financial Accounting to Management Accounting. It covers two points of view: 1. a General Management view with aspects of business planning, cost-volume-profit analysis, degree of operating leverage, mergers and cross border acquisitions, and risk valuation; 2. a Cost Accounting view with Management Accounting systems, flexible budgeting, cost allocations, performance measurement and monitoring, reporting, calculation, manufacturing accounting, job order and process costing, activity based costing, and multi-level contribution margin Accounting. On the UVK website, numerous exam tasks and complete solutions thereto are available in English. Problems & Solutions in Advanced Accountancy Volume I, 6th Edition Maheshwari S.N. & Maheshwari S.K., 2009-11-01. Any book on solved problems would be welcome by the students as they dread the unsolved problems. The most problems and solutions in Advanced Accountancy Vol I and II is the result of realization of the same fact. However, this book will serve its purpose the best if before referring to it, the students have attempted to solve the questions on their own. The book has been designed specially to serve as a complementary set to the textbook Advanced Accountancy Vol I and II, authored by the same team as Dr. S. N. Maheshwari and Dr. S. K. Maheshwari. It contains detailed solutions to all the practical problems given at the end of each chapter in Advanced Accountancy, as also solutions to the problems set at the recent University and Professional Examinations. Special feature of the book is that the problems have been properly graded. Hospitality Management Accounting, 6e Student Workbook Michael M. Coltman, 1998. CRUCIAL ACCOUNTING SKILLS FOR THE HOSPITALITY PROFESSIONAL. In the fast growing and increasingly competitive hospitality industry, every business is under extreme pressure to maximize revenue and minimize costs simply to maintain existing profit levels. Hospitality Management Accounting, Seventh Edition, gives students a firm grounding in the fundamental concepts and analytical techniques they will need as professionals to take direct control of an accounting system and evaluate the effectiveness of current and past operations. Filled with case studies, expanded exercise and problem sections, and alternative solution sets that provide multiple problem solving approaches, this updated new edition is the only text in the field that covers credit card receivables. It features an extensive review of accounting systems and a special section on the use of computers in the hospitality industry. Important topics covered in this text include: Understanding, analyzing, and interpreting financial statements; Ratio analysis.
