Budgeting Practice and Organisational Structure David Dugdale, Stephen Lyne, 2010-01-18 Budgeting is at the heart of the performance management process for most companies However some argue that many companies today are dissatisfied with budgeting It is seen to be costly and time consuming it inhibits action and causes organisational problems The influence of the Beyond Budgeting model has caused many major companies including Toyota to abandon traditional budgeting altogether Should other companies follow suit Budgeting Practice and Organisational Structure explores the changes in budgeting through a survey of financial and non financial managers Concerns include The attitudes of managers towards budgeting models How budgetary practices have changed What problems budgeting can cause The effects of budgets on overall company performance This report reveals that there's little evidence to suggest widespread dissatisfaction with traditional budgeting However to enable a company to perform at its best understanding budgeting in context is essential and it is imperative that budgeting works in tandem with other control systems and organisational structure Original research funded by the Chartered Institute of Management Accounting Reveals the realities of budgeting models in practice Includes interviews and surveys of actual businesses **Designing Cost Management Systems to Support Business Decision-Making** Pieter Buys, 2021-07-19 This book illustrates the importance effective cost management systems in providing a supportive environment in which reliable and relevant management information can be generated Such a cost management system is only attainable if the importance of key business operational and stakeholder

requirements are recognised within the organisational context In illustrating this importance this book provides several case studies as examples thereof The first two case studies focus on the engineering sector and illustrates the development of a cost management system in a water recycling context and the design of a budgetary system in a mining engineering context The remaining case studies focus on the services sector including cost management systems for a digital technology services provider and a medical insurance services provider an alternative activity based costing approach for a public sector services provider and finally a re designed value stream for an automotive services provider Academic researchers and industry managers in the fields of management accounting and financial management as well as engineering and operations management will find value in the experiences described herein

Contemporary Issues in Accounting Elaine Conway, Darren Byrne, 2018-06-01 The book explores the developing challenges and opportunities within the business and finance world which are likely to impact the accounting profession in the near future It outlines a number of approaches to ensure that the accountants of the future are equipped with a useful awareness of some of the key topic areas that are quickly becoming a reality and helps bridge the gap between academia and practice The chapters are standalone introductory pieces to provide useful pr cis of key topics and how they apply to the accounting profession in particular It aims to deliver key readings on hot topics not addressed in other texts which the accounting profession is tackling or are likely to tackle soon Hence the book provides accounting students and researchers a solid grounding in a broad range of highly relevant non technical accounting themes looking at the bigger environment in which future accountants will be operating involving considerations of strategic corporate governance issues and highlighting competences beyond the standard technical accounting skill sets

Analytical Corporate Valuation Pasquale De Luca, 2018-10-31 This book integrates the models employed in the fundamental analysis of a company with the models used by investors in the capital markets to diversify risks and maximize expected returns The underlying thesis is that the company creates value only if the return on capital invested exceeds the cost of capital while the objective is to demonstrate how integration of the fields of corporate finance and asset pricing enables comprehensive and accurate

company valuation Companies can thrive only if they are able to create value for shareholders over time A company s value creation and the correct approach to its measurement require two main skills first the ability to analyze and evaluate the company s fundamentals with respect to its business model and its performance over time and second knowledge of investors models with regard to risk diversification and return maximization from which the cost of capital for the firm is derived Based on this perspective the book combines rigorous quantitative analysis with effective use of graphics to aid intuitive understanding
