educating a class of students who will be critical thinkers active citizens and publicly spirited leaders Guinier presents a plan for considering democratic merit a system that measures the success of higher education not by the personal qualities of the students who enter but by the work and service performed by the graduates who leave Guinier goes on to offer vivid examples of communities that have developed effective learning strategies based not on an individual's merit but on the collaborative strength of a group learning and working together supporting members and evolving into powerful collectives Examples are taken from across the country and include a wide range of approaches each innovative and effective Guinier argues for reformation not only of the very premises of admissions practices but of the shape of higher education itself

Comparative Sociology of Examinations Fumiya Onaka, 2019-03-28 Contemporary societies are constructed constricted and constrained by various series of examinations Governments of both Western and non Western countries tend to conduct detailed multi layered and continuous systems of tests or examinations International tests such as PISA and TIMSS have also been introduced to compare the relative performances of learners within diverse educational institutions across different countries Examinations therefore provide a methodological pivot for comparing a range of societies They enable us to contrast the West and the East the North and the South tribal and mass society ancient and postmodern civilization and so on Comparing parallel societies from across Asia the Middle East Europe and North America this book proposes fundamental transitions in sociological research from system to process and from communication to composition through intensive studies on examinations It uses ethnographies interviews questionnaires documents statistics and big data analyses to make comparisons on broad scales of time and space In so doing it suggests hypotheses encompassing different kinds of societies in human history including those in the Axial Age and the Modern Ages Great Myths of Education and Learning Jeffrey D.
