Le Pollen De Minuit:

Rene Char James R. Lawler, 2015-03-08 Although Ren Char s distinctive voice has brought him to the forefront of contemporary French writers his complex poetry has remained virtually inaccessible to the general reader In this book an eminent authority on French literature describes Char s evolution and through close readings offers a clear and rewarding introduction to the poet s uvre James Lawler first traces Char s growth by delineating the myth that has guided his poetry for forty years While the Surrealists exerted an early influence on the writer his work diverged from theirs as he gave voice to a more personal attitude toward nature and art to a refashioned poetics and thought The author shows how Char s development culminates in the visionary symbolism of *La Paroi et la Prairie* in which wall and prairie epitomize the unresolved tension of his mature writings Throughout his readings Professor Lawler supplements close textual analysis with consideration of thematic mythological and moral elements of the poetry discussing each aspect as it illuminates the nature of Char s sensibility The ten short poems of *La Paroi et la Prairie* are typical of their author he writes and paradigmatic of a work that is a summit of French poetry since Val ry and Apollinaire Originally published in 1978 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Roman Peasant Project 2009-2014 Kim Bowes, 2021-06-04 This book presents the results of the first systematic archaeological study of Roman peasants It examines the spaces architecture diet agriculture market interactions and movement habitus of non elite rural dwellers in a region of southern Tuscany Italy during the Roman period Volume 1 presents the excavation data from eight non elite rural sites including a farm a peasant house animal stall work huts a ceramics factory field drains and a site of uncertain function here framed as individual chapters complete with finds analysis Volume 2 examines this data synthetically in thematic chapters addressing land use agriculture diet markets and movement The results suggest a different more sophisticated Roman peasant than heretofore assumed The data suggests that Roman peasants particularly in the first century BC AD built specialized sites distributed throughout the landscape to maximize use of diverse land parcels This has important implications for the interpretation of field survey data the estimate of rural demographics from that survey and assumptions about the long term changes to human settlement It also points to an important moment of agricultural intensification in this period a contention beginning to be supported by

other studies The project also identified sophisticated systems of land use including crop rotation and an important investment in animal agriculture This work presents the first systematic data from Roman Italy for rural consumption tracking the fine wares made at a production site to local sites nearby This supports the largely theoretical problematizing of the so called consumer city model and suggests the potential importance of rural aggregate demand Movement studies based on finds from the sites themselves describe a more mobile population than anticipated engaged in quotidian and long distance movement patterns supported by the small but steady stream of imports and exports into and out of this seemingly liminal region The book concludes by addressing the implications of this new data for major questions in Roman social and economic history

The Birth of the Gods and the Origins of Agriculture Jacques Cauvin, 2000-07-27 Jacques Cauvin has spent many years researching the beginnings of the Neolithic in the Near East excavating key sites and developing new ideas to explain the hugely significant cultural social and economic changes which transformed mobile hunter gatherers into the first village societies and farmers in the world In this book first published in 2000 the synthesis of his mature understanding of the process beginning around 14 000 years ago challenges ecological and materialist interpretations arguing for a quite different kind of understanding influenced by ideas of structuralist archaeologists and members of the French Annales school of historians Defining the Neolithic Revolution as essentially a restructuring of the human mentality expressed in terms of new religious ideas and symbols the survey ends around nine thousand years ago when the developed religious ideology the social practice of village life and the economy of mixed farming had become established throughout the Near East and east Mediterranean and spreading powerfully into Europe
