**Official Gazette of the United States Patent and Trademark Office** United States. Patent and Trademark Office,1994-11 Mergent International Manual ,2009 *Cancer Epidemiology in China: What We Have Learnt So Far?* Janguang Ji,Tianhui Chen,Xiaochen Shu,Hao Liu,2020-04-13 After several decades of development the socialist market economy of China is now the world s second largest economy by nominal GDP China is also the largest economy by purchasing power parity according to the International Monetary Fund In tandem with the development of the Chinese economy China s cancer burden is rising rapidly due to an ageing population and the adoption of unhealthy lifestyle behaviours According to the data from the National Central Cancer Registry NCCR of China the incidence and mortality of cancer have been increasing rapidly in China In recent years cancer has been the leading cause of death among city residents and the second cause of death among rural residents which has become a stark public health issue in China According to the NCCR an estimated 4.29 million new incident cases 12 thousand per day and 2.81 million death cases 7.5 thousand per day would occur in 2015 in China This corresponds to the age standardized incidence rate ASIR of 201.1 per 100 000 and age standardized mortality rate ASMR of 126.9 per 100 000 respectively Due to the geographical and ethnical disparities in living habits and healthcare level the cancer spectrum differs between different regions and ethnical groups in China According to the estimation from IARC the incidence of nasopharyngeal carcinoma and liver cancer is the world s highest in specific regions of China The incidence of some cancer types in Chinese urban areas such as colorectal prostate kidney and bladder cancers is similar to that in developed countries or regions where the incidence of cancer is highly associated with obesity and westernised lifestyles Nevertheless the incidence of some common cancer types in rural areas including oesophageal stomach liver and cervical cancers shares similarity with less developed countries or regions in the world where cancers are associated with chronic infectious agents due to poverty In addition the mortality rate is higher in rural areas which suggests a poorer cancer prognosis due to late diagnosis and or unsatisfying clinical treatment The distinct cancer patterns of different regions and or ethnic groups indicate a need for precise cancer prevention and control plans tailored for different geographical regions and or ethnic groups The overarching goal of the proposed Frontiers in Oncology Research Topic is to present current perspectives on cancer epidemiology in Chinese characteristics and provide current knowledge of cancer burden as well as cancer mortality to academic investigators clinicians and stakeholders from the translational clinical and public health communities
