Le Suicide Livre II:

Emile Durkheim W. S. F. Pickering, 2001 A five volume collection of scholarly journal articles and chapters from books covering the subject of Emile Durkheim's work The five volumes are thematically organized in the following sections Volume I 1 Durkheim The man himself 2 General sociology Volume II 3 Religion 4 Epistemology and the philosophy of science Volume III 5 Morality and ethics 6 Political sociology Volume IV 7 Suicide and anomie 8 Division of labour and economics 9 EducationP **Le Suicide (Livre II)** Émile Durkheim, 2014-03-13T00:00:00+01:00 Pourquoi les femmes se suicident elles

moins que les hommes Les célibataires plus que les gens mariés Les personnes âgées plus que les jeunes Pourquoi contrairement une idée reçue choisit-on de mourir la belle saison plutôt qu'en hiver C'est ces questions et quelques autres que tente de répondre Le Suicide 1897 monument de la littérature sociologique et plus particulièrement le livre II au cours duquel Durkheim tablit une typologie restée célèbre distinguant les formes de suicides gothiste altruiste anémique ou fataliste Plus encore que l'étude d'un phénomène social Le Suicide est avant tout la mise en application de principes essentiels tirés de la méthode expérimentale Utilisant de façon exemplaire l'outil statistique Durkheim y jette les bases de la science du social

British Sociologists and French 'Sociologues' in the Interwar Years Baudry Rocquin, 2019-01-04 This book is a comparative study of the development of sociology in Britain and France between 1920 and 1940 taking a broad definition of the discipline to examine divergence across the channel in the interwar years Rocquin charts the tension between differing schools of thought presenting an alternative history of Europe based on cultural and intellectual struggle and variation in theoretical visions of society a divide that is still crucial in understanding the present situation between Continental Europe and the United Kingdom This is a compelling addition to the history of sociology and will be of interest to students and scholars across history historical sociology politics European studies and the sociology of knowledge **Le suicide** Émile Durkheim, 1897

, **Asphalt Children and City Streets** Mônica Mesquita, Sal Restivo, Ubiratan D'Ambrosio, 2012-01-01 This work explores the urban experiences of street children in São Paulo Brazil through the mathematical epistemic regimes at the core of their survival strategies We also draw attention to the situation of street children across time space culture and history Our goal is to recognize understand and validate forms of mathematics constructed and used outside of the established institutions of mathematical production We base our analysis on the mathematical imagination which draws together social constructionism and ethnomathematics Theoretically we draw heavily on the Durkheimian tradition in sociology and anthropology We focus on a form of practice that links the formal and the informal in order to realize the full power of mathematical knowledge as a social thing in Durkheim's sense a product of the collective consciousness that expresses collective realities and a category of knowledge present in every culture This is as true for mathematics at the margins as it is for professional mathematics Our work contributes to an emerging political manifesto of the marginal that demonstrates the social realities and social power of their mathematics This book should be of interest to social scientists
