Marcel A. Müller

June 2013 A Level Mathematics Marking Scheme:

Validating Technological Innovation David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

The Routledge International Handbook of Equity and Inclusion in Education Paul Downes, Guofang Li, Lore Van Praag, Stephen Lamb, 2024-05-13 Providing a cornerstone to the global debate on equity and inclusion within education, this handbook explores equity issues pertaining to poverty and social class, race, ethnicity, sociocultural, sociolinguistic exclusion in education and recognises intersectionality and gender across these dimensions. This carefully curated collection of essays written by international experts promotes inclusive systems in education that explicitly recognise the voices of learners who may be at risk of marginalisation, exclusion or underachievement. Developing a multilayered innovative conceptual framework involving spatial, emotional, relational and dialogical turns for education, it emphasises key system points for reform, including building strategic bridges between health and education for vulnerable groups and shifts in focus for initial teacher education and the wider curriculum. The handbook is organised into the following key parts: Theoretical Frameworks, Funding Models and Structures for Equity and Inclusive Systems, Exclusion and Discrimination, Bridging Health and Education, Agency and Empowerment, Outreach and Engagement. The Routledge International Handbook of Equity and Inclusion in Education will be of great value to academics operating in the areas of education, psychology, sociology, social policy, ethnography, cultural studies, researchers in university research centres and in policy institutes pertaining to education, poverty, social inclusion, as well as international organisations involved with inclusion in education.

Education under Siege Mortimore, Peter, 2013-09-23 At a time when education is considered crucial to a country's economic success, recent UK governments have insisted their reforms are the only way to make England's system world class. Yet pupils are tested rather than educated, teachers bullied rather than trusted, and parents cast as winners or losers in a gamble for school places. *Education under siege* considers the English education system as it is and as it might be. In a highly accessible style, Peter Mortimore, an author with wide experience of the education sector both in the UK and abroad, identifies the current system's strengths and weaknesses. He concludes that England has some of the best teachers in the world but one of the most muddled systems. Challenging the government's view that there is no alternative, he proposes radical changes to help all schools become good schools. They include a system of schools receiving a fair balance of pupils who learn easily and those who do not, ensuring a more even spread of effective teachers, as well as banning league tables, outlawing selection, opening up faith schools and integrating private schools into the state system. In the final chapter, he asks readers who share

his concerns to demand that the politicians alter course The book will appeal to parents education students and teachers as well as everyone interested in the future education of our children Current Affairs Capsule May 2019
