Banking on Death Robin Blackburn,2020-05-05 Banking on Death offers a panoramic view of the history and future of pension provision A work of unique scope it traces the origins and development of the pension idea from the days of the French Revolution to the troubles of the modern welfare state As we live longer employers are closing their pension schemes and many claim that public treasuries will not be able to cope with the retirement of the babyboomers Banking on Death analyses the challenge facing public schemes and the malfunctioning of private retirement provision concluding with a bold proposal for how to pay for decent pensions for all Robin Blackburn argues that pension funds have been depleted by wasteful promotion and used as gambling chips by ruthless and overpaid top executives This is the world of grey capitalism where employees savings are sequestered from them and pressed into the service of corporate aggrandisement Even the best companies find it hard to run a business and a pension fund at the same time especially when the latter is larger than the former The fund managers notorious short termism and herd instinct and their failure to curb the greed and irresponsibility of the corporate elite lead to obscene inequalities and a blighted social landscape The pension privatisation lobby Blackburn shows has lost major battles in France and Germany the United States and Italy because of the popular fears it evokes And the case for privatisation looks intellectually threadbare after withering critiques from such notable theorists as Joseph Stiglitz and Pierre Bourdieu Banking on Death shows that pensions are political dynamite and have undone governments from France and Italy to Argentina Popular outcries led Reagan Clinton and Blair to change tack will this happen to George W Bush too Blackburn argues that the ageing society will generate increased costs but so long as the new

life course is properly financed all age groups will gain He proposes a public regime of asset based welfare drawing on the ideas of John Maynard Keynes and Rudolf Meidner that could ensure secondary pensions for all and foster a more responsible egalitarian and humane pattern of economic development

Thirty Years of Economic Policy Charles Wyplosz, 2015-10-22 Over the last 30 years Economic Policy has strived to produce policy relevant and rigorous analyses of the economic challenges of the time A number of articles have been highly influential shaping thinking among academic economists and policymakers This volume brings together key historic articles that still resonate today It provides academics with important research markers and also provides students and their teachers with a reader that demonstrates how the field of economics progresses by responding to challenges of the time It will also inspire a new generation of students and academics with a recollection of how some of today's most influential economists made early contributions

Economics for Business Andrew Dolce, 1964 The Journal of Industrial Economics, 1984 **Bibliographie der Wirtschaftswissenschaften**, 1998 The Transition in Eastern Europe, Volume 1 Olivier Jean Blanchard, Kenneth A. Froot, Jeffrey D. Sachs, 2008-04-15 When communism fell in 1989 the question for most Eastern European countries was not whether to go to a market economy but how to get there Several years later the difficult process of privatization and restructuring continues to concern the countries of the region The Transition in Eastern Europe Volumes 1 and 2 is an analysis of the experiences of various countries making the transition to market economies and examines the most important challenges still in store Volume 1 Country Studies gives an in depth country by country analysis of various reform experiences including historical backgrounds and discussions of policies and results to date The countries analyzed are Poland Czechoslovakia Hungary eastern Germany Slovenia and Russia Written by leading economists some of whom helped shape local and national reforms this volume identifies common progress common difficulties and tentative solutions to the problems of economic transition Volume 2 Restructuring focuses on specific issues of transition including how to design labor market institutions privatization new fiscal structures and bankruptcy laws how to reorganize foreign trade and how to promote foreign direct investment The articles written by experts in the field will be of direct help to those involved in the transition process These volumes provide a standard reference on economic transition in the region for policymakers in Eastern Europe and in western countries for international agencies concerned with the transition process and for anyone interested in learning about the dramatic changes that have recently occurred in Eastern Europe
