

be a folder for each user on each workstation, or an administrator can configure Real-Time Adherence to store all users' client documents in a central location.

If the Real-Time Adherence configuration includes each user's document path on the user workstation, then each Real-Time Adherence user who uses that workstation will have a document path on that workstation, typically:

**C:\Program Files\Aspect\RTA\DOCS\username**

where *username* is the user's Real-Time Adherence login name. If Real-Time Adherence is configured to use a common client document path, then each user's Real-Time Adherence documents are stored in the common client document folder specified during installation.

The Set Document Path dialog box opens only if the following conditions are met:

- You are logging in to Real-Time Adherence for the first time on this workstation.
- No default document path has been set.

If this dialog box opens, do one of the following to set the document path:

- Click **OK** to accept the default document path.
- Type another **document path** in the Full Document Pathname field.

## Changing the Default Document Path

3. In the Document Path field, type the **document path**.
