Borderline Personality Disorder Barbara Stanley, Antonia S. New, 2018. Until recently, borderline personality disorder has been the step child of psychiatric disorders. Many researchers even questioned its existence. Clinicians have been reluctant to reveal the diagnosis to patients because of the stigma attached to it. But individuals with BPD suffer terribly and a significant proportion die by suicide and engage in non-suicidal self-injury. This volume provides state-of-the-art information on clinical course, epidemiology, comorbidities and specialized treatments.

Non-Suicidal Self-Injury Kelly L. Wester, Heather C. Trepal, 2016-12-19. Grounded in a wellness strengths-based and developmental perspective, *Non-Suicidal Self-Injury* is the ideal guide for counselors and other clinicians seeking to understand self-injurious behaviors without pathologizing them. The book covers topics not previously discussed in other works, including working with families, supervising counselors working with clients who self-injure, DSM-5 criteria regarding the NSSI diagnosis, NSSI as a protective factor for preventing suicidal behavior, and advocacy efforts around NSSI. In each chapter, clinicians will also find concrete tools, including questions to ask, psychoeducational handouts for clients and their families, treatment handouts, or treatment plans for counselors and more. *Non-Suicidal Self-Injury* also includes real-life voices of individuals who self-injure, as well as case vignettes to provide examples of how theoretical models or treatments discussed in this book immediately apply to practice.

Non-Suicidal Self-Injury in Eating Disorders Laurence Claes, Jennifer J. Muehlenkamp, 2013-10-10. Non-suicidal self-injury and eating disorders represent significant problems among today's youth and pose unique challenges for clinicians, particularly when they co-occur. This book is a rare resource in that it provides cutting-edge information on the interactions between self-injury and disordered eating, empirically informed treatments for the co-occurrence of these behaviors, and specific topics relevant to understanding nuances in the risk factors, treatment, and prevention of both self-injury and eating disorders. Practitioners, graduate students, and researchers working within this specialized area will find this text to be instrumental in advancing their knowledge and improving the treatment of self-injury in those with eating disorders.
