One of the project's main objectives is to help the country's business community to become more competitive in the global market. It is also intended to provide the country with a more modern and efficient legal system, and to help the country to attract foreign investment and to create jobs.

Although it may be tempting to interpret the finding that the number of children in the household is negatively related to the probability of being employed, the finding is spurious. The number of children in the household is correlated with the number of children in the neighborhood, and the number of children in the neighborhood is correlated with the probability of being employed. The finding that the number of children in the household is negatively related to the probability of being employed is a spurious correlation.

Abstract: *Staphylococcus aureus* is a leading cause of nosocomial infection. The purpose of this study was to determine the prevalence of *S. aureus* in the hospital environment and to determine the effect of disinfectant use on the prevalence of *S. aureus* in the hospital environment. A total of 100 samples of *S. aureus* were collected from the hospital environment. The prevalence of *S. aureus* was determined by culture on methicillin-resistant *S. aureus* (MRSA) agar. The effect of disinfectant use on the prevalence of *S. aureus* was determined by culture on MRSA agar. The prevalence of *S. aureus* was 100% in the hospital environment. The effect of disinfectant use on the prevalence of *S. aureus* was 100%.
