should be on the process not the answer Elementary teachers should know the mathematics content they are teaching know more than the content they are teaching and teach from the overflow of knowledge It is important for teachers to be flexible in allowing students to use different procedures teaching from the overflow of knowledge implies knowing how to do a given operation more than one way and being willing to examine many different ways Teachers need to learn to carefully cover the topics to be taught to reflect upon them and to be able to organize them To help prospective elementary teachers concentrate on the mathematics content they will be expected to teach and begin to build the foundation for the methods they will use this text includes only elementary mathematics content and does not address middle school concepts

Pedagogical features The text is organized according to NCTM Standards An informal writing style speaks directly to readers and is geared to pre service teachers Focus is given to multiple methods of problem solving at four developmental levels Questions exercises and activities are interspersed throughout each section rather than gathered at the end of each chapter Complete solutions for exercises are provided

Mathematics for Elementary School Teachers Tom Bassarear, 2001. The first and only text of its kind. *Mathematics for Elementary School Teachers 2e* offers a comprehensive content approach designed to foster hands on discovery based mathematics instruction. Students first encounter new concepts through hands on activities in the Explorations Manual enabling them to construct their own understanding of the material. The text then serves as a resource for further investigation, explanation and clarification. Unlike most texts which present exercises very similar to examples, Bassarear demonstrates how real life problems are generally complex and often filled with ambiguity.
