 (State)., Number of Exhibits 9 Handbook of Fabrication Processes Orville D. Lascoe,1988 This book is a valuable
 reference for the materials engineer the manufacturing engineer or the technician who wants a practical description of
 fabrication processes Sheet metal fabrication processes are receiving greater attention and are more widely applied by the
 metalworking industries because of the savings in cost and material This book compiles the proven theories and operations
 tested in industrial applications Focus is on the non chip producing machine tools that shape metals by shearing pressing and
 forming New materials and advances in tooling are discussed as well as the need for applied science in optimizing the
 operations for sheet metal fabrication processes Examples of each of these forming processes are given and the text also
 describes the mechanics of each process so that a logical decision can be made concerning the best operation for a specific
 result The volume is divided into five sections each consisting of a series of chapters The major sections cover fabricating
 presses stamping and forming operations plastics for tooling structural shapes and non traditional machining A section on
 definitions and terminology is also included The book is profusely illustrated and indexed making it easy to find references to
 specific forming topics Written by an expert with 40 years of hands on practical engineering experience this Handbook
