Pot Cookery Author Bio Publisher Introduction to Aging They tell us that Methuselah lived 900 years But then at that time
longevity was the rule and not the exception This process of growing old chronologically is a normal process of life It occurs
in every living thing present in nature External factors also age nonliving things with the passage of time A person is called
old on the basis of his chronological age That is why in the 21st century anyone who has passed the age of three score and 10
will be considered to be old However in olden times people lived for anywhere between 200 to 300 years and still managed to
look youthful and had as much energy as young adults The slowing down of the aging process is due to many factors most of
which are not present in the 21st century scenario This includes clean air healthy pollution free atmosphere a good natural
diet lots of exercise and also a strong disease free gene line With the passing of time the natural good health and
comparatively long age enjoyed by man 5000 years ago has deteriorated a lot The functional state of a living organism which
is also known as the biological age is going to have a great influence on the aging of the person This is going to show up
mentally and physically in signs Bring off the hair on the scalp is one such feature Another feature is the presence of wrinkles
and folds on the face forehead neck and forearms *Naturopathy for Longevity* Mr. Ajeet Singh, 2018-05-14 Explores how
naturopathy balanced diet herbal medicine and lifestyle management can promote healthy aging vitality and longevity
