Louis I. Kahn, 2004 **Limits and Languages in Contemporary Irish Women's Poetry** Daniela Theinová, 2020-10-18

*Limits and Languages in Contemporary Irish Women's Poetry* examines the transactions between the two main languages of Irish literature, English and Irish, and their formative role in contemporary poetry by Irish women. Daniela Theinová explores the works of well-known poets such as Eavan Boland, Eilín Ní Chuilleanáin, Nuala Ní Dhomhnaill, Biddy Jenkinson and Medbh McGuckian, combining for the first time a critical analysis of the language issue with a focus on the historical marginality of women in the Irish literary tradition. Acutely alert to the textures of individual poems even as she reads these against broader critical theoretical horizons, Theinová engages directly with texts in both Irish and English. By highlighting these writers' uneasy poetic and linguistic identity and by introducing into this wider context some more recent poets including Vona Groarke, Caitríona O'Reilly, Sinéad Morrissey, Ailbhe Darcy and Aifric Mac Aodha, this book proposes a fundamental critical reconsideration of major late twentieth century Irish women poets and, by extension, the nation's canon. *Designing*

*Kinetics for Architectural Facades* Jules Moloney, 2011-06-14 Architectural facades now have the potential to be literally kinetic through automated sunscreens and a range of animated surfaces. This book explores the aesthetic potential of these new types of moving facades. Critique of theory and practice in architecture is combined here with ideas from kinetic art of the 1960s. From this background, the basic principles of kinetics are defined and are used to generate experimental computer animations. By classifying the animations, a theory of kinetic form called state change is developed. This design research provides a unique and timely resource for those interested in the capacity of kinetics to enliven the public face of architecture. Extra material including animations can be seen at [www.kineticarch.net/statechange](http://www.kineticarch.net/statechange). **Louis Kahn** Mateo

Kries, Jochen Eisenbrand, Stanislaus von Moos, 2012 The American architect Louis Kahn (1901-1974) is regarded as one of the great master builders of the twentieth century. With complex spatial compositions, an elemental formal vocabulary and a choreographic mastery of light, Kahn created buildings of archaic beauty. As the first comprehensive publication on this architect in 20 years, the book *Louis Kahn: The Power of Architecture* presents all of his important projects. It includes essays by prominent Kahn experts and an expansive illustrated biography with many new facts and insights about Kahn's life and work. In a number of interviews, leading architects such as Frank Gehry, Renzo Piano, Peter Zumthor and Sou Fujimoto underline Kahn's significance in today's architectural discourse. An extensive catalogue of works features original drawings and architectural models from the Kahn archive. The compendium is further augmented by a portfolio of Kahn's travel

drawings as well as photographs by Thomas Florschuetz which offer completely new views of the Salk Institute and the Indian Institute of Management
