**Global Economic Prospects, June 2015** The World Bank,2015-06-22 Global growth is expected to be 2.8 percent in 2015 but is expected to pick up to 3.2 percent in 2016. Growth in developing countries and some high income countries is set to disappoint again this year. The prospect of rising borrowing costs will compound the challenges many developing countries are facing as they adapt to an era of low commodity prices. Risks to this outlook remain tilted to the downside. This edition of Global Economic Prospects includes two Special Features that analyze the policy challenges raised by the two transitions in developing countries: the risks associated with the first U.S. central bank interest rate increase since 2006 and the implications of persistently low commodity prices for low income countries. Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects with a special focus on developing countries on a semiannual basis in January and June. The January edition includes in depth analyses of topical policy challenges faced by developing countries while the June edition contains shorter analytical pieces.

Financialisation in the European Periphery Ana Cordeiro Santos,Nuno Teles,2020-09-03 In many European countries the process of financialisation has been exacerbated by the project of closer EU integration and accelerated as a result of austerity policies introduced after the Euro crisis of 2010-2012. However the impact has been felt differently in core and peripheral countries. This book examines the case of Portugal and in particular the impact on its economy work and social reproduction. The book examines the recent evolution of the Portuguese economy of particular sectors and systems of social provision including finance housing and water labour relations and income distribution. In doing so it offers a comprehensive critical analysis of varied aspects of capital accumulation and social reproduction in the country which are crucial to understand the effects of the official bail out of 2011 and associated austerity adjustment program. The book shows how these have increasingly relied on deteriorating pay and working conditions and households direct and indirect engagement with the global financial system in new domains of social reproduction. Through its exploration of the Portuguese case the book presents a general theoretical and methodological framework for the analysis of financialisation processes in peripheral countries. This text is essential reading for students and scholars of political economy development geography international relations and sociology with an interest in examining the uneven mechanisms and impacts of global finance.
