Memorandum Geo1 June 2014:

Assembling the Archipelago: Heritage in Energy Transitions and Climate Action Marilena Mela, 2025-09-09 This book explores the potential of heritage to enact sustainable human environment relationships across geographical differences. It does so by travelling to four archipelagoes: the Wadden Islands in the Netherlands, the Cyclades in Greece, Shetland in Scotland, and the Aeolian Islands in Italy. In the face of planetary socioenvironmental crises, the reliance on sustainable development strategies including the energy transition on technocratic top-down solutions fail to counterbalance global agendas of extraction and growth and address environmental injustices in peripheral places. This book stresses the need to think small, arguing that seeds for meaningful change exist in such places and the geographically and historically situated relationships between people and environments. Islands, interconnected yet autonomous places with unique histories, are good places to start. In four archipelagoes, frictions produced both by climate change and climate mitigation, the fragile consensus around a solar park in the Wadden Sea, conflicts around wind turbine towers in the Aegean, experiments with the tides in Shetland, and volcanic episodes in the Aeolian, come in dialogue with the learning potential of their environmental and cultural heritage. The counterposing of these stories renegotiates established discourses of heritage and sustainability and the associated courses of action in policy and planning. This contribution will resonate with academics, students, policymakers, and activists in heritage studies, environmental humanities, landscape studies, science and technology studies, and sustainability. Readers are invited to participate in the life and troubles of four island landscapes and to think along on emergent archipelagic claims towards sustainable and just futures.

Decolonising Geography? Disciplinary Histories and the End of the British Empire in Africa, 1948-1998 Ruth Craggs, Hannah Neate, 2023-10-16 **DECOLONISING GEOGRAPHY** This book presents an extraordinarily sensitive account of geography's histories in five African countries subjected to British colonial rule. Craggs and Neate draw together political and imaginative processes of decolonisation through an innovative biographical approach that humanizes and enlivens the story of our academic discipline. It will be an invaluable resource for those seeking a deeper understanding of decolonisation, its recent trajectories, and far-reaching implications on the African continent. Shari Daya, Affiliate Associate Professor in Environmental and Geographical Science, University of Cape Town. By placing the experiences, ideas, and practices of African geographers in the center of their analyses, Craggs and Neate provide an unprecedented account of historical and contemporary decolonizing struggles within Geography and the academy. This book should be required reading for all those looking to decolonize the discipline and dislodge it from its Global North histories, institutions, and ideologies. Mona Domosh, Professor of Geography, The Joan P and Edward J. Foley Jr. 1933 Professor, Dartmouth College. This meticulous work explores how colonialism, decolonization, and postcolonialism shaped African geography and geographers. It sheds light on efforts to Africanize the discipline, a process which I was both witness to and a participant in. Stanley Okafor, Professor of Geography, Retired, University of Ibadan. How did

a generation of academic geographers engage with constitutional decolonisation during the end of the British empire in Africa In *Decolonising Geography Disciplinary Histories and the End of the British Empire in Africa 1948 1998* Ruth Craggs and Hannah Neate explore how the teaching research administration and activism of geographers in Africa shaped the discipline and the post colonial geopolitics of the continent The authors follow the professional lives of individual geographers to provide fresh insights into decolonisation in the former British Empire in Africa drawing from extensive archival research and more than 40 oral history interviews with geographers in Ghana Nigeria South Africa Tanzania and the UK *Decolonising Geography* is a must read for any reader in the UK and Africa with an interest in the relationships between geography and decolonisation *Asymmetric Crisis in Europe and Possible Futures* Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics *People's Force* Robert Haldane, 2018-02-26 Since its formation in 1853 the story of the Victoria Police has been interwoven with Victorian social and political history Following the amalgamation of seven separate and distinct police agencies in the colony the resultant unified body was the first of its kind in Australia Many events have shaped its development the gold rushes the Clunes riot the Kelly outbreak the maritime strikes the coming of the motor car the police strike both world wars and the Vietnam war protests the gangland wars Black Saturday bushfires and the use of DNA to solve crimes all formed part of this mosaic This revised edition of *The People's Force* containing a new chapter and new illustrations brings the history up to date to include a decade that has been full of turbulent change The new chapter examines the administrations of Neil Comrie Christine Nixon Simon Overland Ken Lay and Graham Ashton New material deals with Silk and Miller and other police shootings the growth of terrorism gender issues racism and domestic violence

Written as a warts and all history of the Victoria Police with the support and encouragement of the then Chief Commissioner S I Mick Miller who wanted a proper objective history of the force not a public relations exercise This third edition is owed largely to Miller s encouragement and his desire to see the history updated **Rockhound: A Geography of Collecting** Michael Gordon,2017-05-15 In this book Rockhound A Geography of Collecting you will be shown Ontario s incredible history of mineral extraction and as you will see rockhounds follow in the signature that every industry left The full Rockhound series tells you how and where to find crystals minerals gold diamonds and all manner of rock and mineral treasure for the collector this book is an absolute gem and an essential guide to Ontario geology as it relates to mineral collecting *Treaty Series* ,1998 *B.
