Classification of Nursing Diagnoses North American Nursing Diagnosis Association, 1986 Critical Care Nursing Carolyn M. Hudak, Barbara M. Gallo, Julie J. Benz, 1994 Endocrine Practice, 2000 Introduction to Clinical Endocrinology Adair Stuart Mason, 1957 A Life-span Approach to Nursing Care for Individuals with Developmental Disabilities Shirley P. Roth, Joyce S. Morse, 1994 Written by and for nurses this comprehensive reference provides sound theory based approaches and practical recommendations for the individualized nursing care of people with developmental disabilities Using in depth case studies helpful charts and tables and problem solving strategies the book addresses fundamental nursing issues such as health promotion infection control seizure management adaptive and assistive technology and sexuality It is an ideal resource for nurses working in community based centers schools group homes residential centers and home health programs and an excellent guide for student nurses and other health care professionals

Critical Care Nursing Patricia Gonce Morton, 1998 This book is organized into five parts the first two of which cover areas

applicable to all critical care patients including the patient's and family's experience, education, pain management, ethical and legal issues, and the rewards and challenges of critical care nursing. The third part addresses specific populations including pediatric patients, pregnant women, older adults, and postanesthesia patients, as well as interfacility transport. The balance of the book is arranged by body systems and concludes with multisystem problems. This is the seventh edition of a text first published in 1973 and last published in 1994. The purpose is to present current, comprehensive and practical information built on a holistic perspective of care in which the patient is the core of nursing practice. This book meets a need for educating students and nurses in the critical care environment. The editors' objective of providing a framework for focusing on patient responses in the critical care environment is met. This book is intended for students, critical care educators, and clinicians. This edition is also tailored to meet the needs of patients. The editors are excellent authorities in critical care nursing. All three are practitioners, and one is both practitioner and educator. The contributors and reviewers are critical care experts. The illustrations are used best to understand critical care technology. The graphics used for anatomy, physiology, and patient assessment add to the usefulness of the text. The references are pertinent and current, but certain specialty content would need to be updated by the reader, e.g., medication protocols for CHF. The use of color in the text is managed carefully to guide and not overpower the reader. The 1997 ACLS Guidelines are in Appendix 1. The Answer Key to Study Questions appears in Appendix 2. Anatomy and physiology, patient assessment, and clinical management, nursing research, collaborative plans of care, teaching, and home care issues are some of the innovations presented. One strength of the book is how it addresses the changes associated with aging and the needs of the older adult. Aging concerns are covered in one chapter and are highlighted throughout the text. This edition provides current information that makes the previous edition out of date. I would recommend this text for beginning critical care nurses and for undergraduate nursing students for its coverage of advanced pathophysiological concepts.

Mental Health Nursing Verna Benner Carson, 2000. In addition to comprehensive coverage of all standard topics in psychiatric nursing, the New Edition of this groundbreaking text offers unparalleled insights into the human side of mental illness. It enables readers to empathize with psychiatric patients and treat them with dignity and understanding. A unique holistic approach prepares readers to care for all of their patients' needs: physical, psychological, social, and spiritual. This second edition contains new, one-of-a-kind appendices on patient/family teaching and spiritual interventions, clinical practice guidelines for home care, testimonials from mental health nurses in a full range of settings, new full-color brain scan images that depict visible differences in the brains of patients with certain mental illnesses, and much more.
