Grinnell, Yvonne A. Unrau, 2005 This book is the longest standing and most widely adopted text in the field of social work research and evaluation Since the first edition in 1981 it has been designed to provide beginning social work students the basic methodological foundation they need in order to successfully complete more advanced research courses that focus on single system designs or program evaluations Its content is explained in extraordinarily clear everyday language which is then illustrated with social work examples that social work students not only can understand but appreciate as well Many of the examples concern women and minorities and special emphasis is given to the application of research methods to the study of these groups Without a doubt the major strength of this book is that it is written by social workers for social work students The editors have once again secured an excellent and diverse

group of social work research educators The 31 contributors know firsthand from their own extensive teaching and practice experiences what social work students need to know in relation to research They have subjected themselves to a discipline totally uncommon in compendia that is writing in terms of what is most needed for an integrated basic research methods book rather than writing in line with their own predilections *First[-Third and Final] Report of the Adhesives Research Committee* Great Britain. Status Report Financial Accounting Standards Board,1981 Developing and Sustaining a Research-supportive Curriculum Kerry K. Karukstis,Timothy E. Elgren,2007 This compendium of successful curricular and institutional practices to develop critical research skills emphasized the importance of the collective efforts of the undergraduate community to integrate research and education By collecting and disseminating a variety of mechanisms that are effective means of creating a research supportive undergraduate curriculum the Council on Undergraduate Research aims to encourage faculty and institutions to continue to seek creative useful and significant ways to promote learning through research Publisher s description Final Report of the Advisory Committee on Human Radiation Experiments United States. Advisory Committee on Human Radiation Experiments,1996 This book describes in fascinating detail a variety of experiments sponsored by the U S government in which people were exposed to radiation without their knowledge After reviewing hundreds of thousands of documents from the Atomic Energy Commission and other agencies the Advisory Committee appointed by President Clinton in January 1994 found that nearly 4 000 human radiation experiments most involving very low doses of radioactive tracers were sponsored by the federal government between 1944 1974 This book documents these findings to provide a fascinating if not disturbing reminder of both the shocking standards for human experimentation and the practice of government secrecy in recent history Carried out at the height of the Cold War experiments included feeding radioactive cereal to teenagers at a

school for the mentally retarded irradiating the testicles of prison inmates injecting plutonium into hospital patients and intentional releases of radiation into the environment The book places these experiments within their historical context and a review of the relevant government policies and ethics standards at the time is included The analysis is then applied to contemporary research on human subjects The book concludes with a discussion of the Committee's key findings and a set of recommendations for changes in institutional review boards the interpretation of ethics rules and policies the conduct of research involving military personnel the oversight and accountability for ethical violations compensation for research injuries and balancing national securities interests with the rights of the public This compelling volume will prove to be a landmark in the development of standards for human experimentation Ethicists public health professionals and those interested in the history of medicine and Cold War history will be intrigued by the findings in this volume Publisher description LoC *Report of the International Whaling Commission* International Whaling Commission,1993 Report of the Commission - International Whaling Commission International Whaling Commission,1995
