Le Journal De Bridget Jones:

The Reception of Jane Austen in Europe Anthony Mandal, Brian Southam, 2007-10-13 This volume of international research provides a wide ranging account of Jane Austen's reception across the length and breadth of Europe from Russia and Finland in the North to Italy and Spain in the South In historical terms the survey ranges from the near contemporary since Austen's novels were available in French very soon after their original publication to modern times in those countries which for various reasons linguistic historical or ideological have taken up the novels only in recent years For many Austen's novels are valued for their romantic content as love stories but increasingly they are being perceived as sophisticated ironic narratives In this the quality of translation has been a significant factor and the many film and television adaptations have played an important part in establishing Austen's reputation amongst the public at large It will be seen from this that across Europe Austen's reception history is far from uniform and has been shaped by a complex of extra literary forces **Film**

Norwegian Discourse Ellipsis Mari Nygård, 2018-04-15 This book develops a grammar model which accounts for discourse ellipses in spoken Norwegian This is a previously unexplored area which has also been sparsely investigated internationally The model takes an exoskeletal view where lexical items are inserted late and where syntactic structure is generated independently of lexical items Two major questions are addressed Firstly is there active syntactic structure in the ellipsis site Secondly how are discourse ellipses licensed It is argued that both structural and semantic restrictions are required to account for the empirical patterns Discourse ellipses can be seen as a contextual adaptation Ellipsis is only possible in certain contexts The existence of ellipsis may lead to the impression that syntax is partly destroyed However the analysis shows that narrow syntax is not affected The underlying structure stays intact as the licensing restrictions concern only phonological realization Hence the grammar of discourse ellipses is best characterized as an interface phenomenon

Commitment Philippe de Brabanter, 2008 Commitment is a notion widely invoked in speech act theory in studies on modality and in dialogue modelling but it has never been the central topic of a monograph or a collective volume in linguistics This volume is the very first to bring together researchers from different linguistic traditions and request them to focus on the notion All the contributions presented here use commitment as a key concept in accounting for a broad range of linguistic phenomena in various languages from illocutionary acts like assertions and questions to modal expressions through sentence types finite subordinate clauses concessive markers tense markers and even text types and genres Each contributor takes pains to explicate his her understanding of the term commitment thus making interesting comparisons possible across theoretical boundaries Some authors also point out potential drawbacks of the notion and argue for replacing or supplementing it with a related concept of involvement
