S D logic in more detail Seven years after the initial publication in the Journal of Marketing no comprehensive overview of the existing literature has yet been made How did long established scholars respond to the suggestions and findings of Vargo and Lusch Was it rather positive or negative What needs to be done in the future in order to actually implement a service centered thinking In the following chapters I will introduce the basic ideas of S D logic followed by a detailed state of literature to capture the various publications that arose from the initial Vargo and Lusch article The vast majority of marketing research one could name it mainstream marketing research is concerned with consumer or B2C marketing But what about business to business relationships It is interesting to figure out whether the concepts of a service dominant logic display similarities with concepts of B2B marketing and whether they could successfully be adopted in B2B markets This is what I am going to examine in the last part of this thesis
