Memorandum Of Preparatory 2014 History Paper1:

Global Inequality and American Foreign Policy in the 1970s Michael Franczak, 2022-06-15 In *Global Inequality and American Foreign Policy in the 1970s* Michael Franczak demonstrates how Third World solidarity around the New International Economic Order NIEO forced US presidents from Richard Nixon to Ronald Reagan to consolidate American hegemony over an international economic order under attack abroad and lacking support at home The goal of the nations that supported NIEO was to negotiate a redistribution of money and power from the global North to the global South Their weapon was control over the major commodities in particular oil that undergirded the prosperity of the United States and Europe after World War II Using newly available archival sources as well as interviews with key administration officials Franczak reveals how the NIEO and North South dialogue negotiations brought global inequality to the forefront of US national security The challenges posed by NIEO became an inflection point for some of the greatest economic political and moral crises of 1970s America including the end of golden age liberalism and the return of the market the splintering of the Democratic Party and the building of the Reagan coalition and the rise of human rights in US foreign policy in the wake of the Vietnam War The policy debates and decisions toward the NIEO were pivotal moments in the histories of three ideological trends neoliberalism neoconservatism and human rights that formed the core of America's post Cold War foreign policy

Building States Eva-Maria Muschik, 2022-04-13 Postwar multilateral cooperation is often viewed as an attempt to overcome the limitations of the nation state system However in 1945 when the United Nations was founded large parts of the world were still under imperial control *Building States* investigates how the UN tried to manage the dissolution of European empires in the 1950s and 1960s and helped transform the practice of international development and the meaning of state sovereignty in the process Eva Maria Muschik argues that the UN played a key role in the global proliferation and reinvention of the nation state in the postwar era as newly independent states came to rely on international assistance Drawing on previously untapped primary sources she traces how UN personnel usually in close consultation with Western officials sought to manage decolonization peacefully through international development assistance Examining initiatives in Libya Somaliland Bolivia the Congo and New York Muschik shows how the UN pioneered a new understanding and practice of state building presented as a technical challenge for international experts rather than a political process UN officials increasingly took on public policy functions despite the organization's mandate not to interfere in the domestic affairs of its member states These initiatives Muschik suggests had lasting effects on international development practice peacekeeping and post conflict territorial administration Casting new light on how international organizations became major players in the governance of developing countries *Building States* has significant implications for the histories of decolonization the Cold War and international development

Once and Future Partners William C. Potter, Sarah Bidgood, 2018-10-09 Despite their Cold War rivalry the United States and the Soviet Union frequently engaged in joint efforts to prevent the spread of

nuclear weapons Leaders in Washington and Moscow recognized that nuclear proliferation would serve neither country's interests even when they did not see eye to eye in many other areas They likewise understood why collaboration in mitigating this nuclear danger would serve both their own interests and those of the international community This volume examines seven little known examples of US Soviet cooperation for non proliferation including preventing South Africa from conducting a nuclear test developing international safeguards and export control guidelines and negotiating a draft convention banning radiological weapons It uses declassified and recently digitized archival material to explore in depth the motivations for and modalities for cooperation under often adverse political circumstances Given the current disintegration of Russian and US relations including in the nuclear sphere this history is especially worthy of review Accordingly the volume's final chapter is devoted to discussing how non proliferation lessons from the past can be applied today in areas most in need of US Russian cooperation

Yearbook of International Organizations 2013-2014 (Volumes 1a-1b) Union Of International Associations, Union of International Associations, 2013-06-21 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events

Statelessness after Arendt Kolleen Guy, Jay Winter, 2025-05-27 This book is a study of statelessness in the period of the Second World War It breaks new ground by focusing not on Europe but on the Asian and Pacific theatres of the conflict This perspective enables us to go beyond Hannah Arendt's classic account of statelessness in her *Origins of Totalitarianism* To her statelessness was the product of a failed European nation state system We find a very different story when we examine the history of stateless people many of them Jews fleeing to Asia from Europe In Asia we see that being stateless was not a uniform experience but a variety of possibilities reflecting the political structure of the states and cities in which refugees found shelter We find too that stateless people managed to enter the political realm long before they reached the threshold of citizenship
