The Oxford Handbook of Generality in Mathematics and the Sciences Karine Chemla, Renaud Chorlay, David Rabouin, 2016 This collection of original essays aims to inquire into the diversity of Generality Through case studies taken from the history of mathematics physics and the life sciences the book provides evidence of different ways of understanding the general in various contexts *The Space of Mathematics* Javier Echeverria, Andoni Ibarra, Thomas Mormann, 2012-10-25 No detailed description available for The Space of Mathematics **The Mathematical Heritage of Henri Poincare** Felix E. Browder, 1983-12-31 On April 7 10 1980 the American Mathematical Society sponsored a Symposium on the Mathematical Heritage of Henri Poincaré held at Indiana University Bloomington Indiana This volume presents the written versions of all but three of the invited talks presented at this Symposium those by W Browder A Jaffe and J Mather were not written up for publication In addition it contains two papers by invited speakers who were not able to attend S S Chern and L Nirenberg If one traces the influence of Poincaré through the major mathematical figures of the early and midtwentieth century it is through American mathematicians as well as French that this influence flows through G D Birkhoff Solomon Lefschetz and Marston Morse This continuing tradition represents one of the major strands of American as well as world mathematics and it is as a testimony to this tradition as an opening to the future creativity of mathematics that this volume is dedicated This part contains sections on topological methods in nonlinear problems mechanics and dynamical systems ergodic theory and recurrence and historical material **The Concept and the Role of the Model in Mathematics and Natural and Social Sciences** Hans Freudenthal, 2012-12-06 Proceedings of the Colloquium sponsored by the Division of Philosophy of Sciences of the International Union of History and Philosophy of Sciences organized at Utrecht January 1960 *Revue Semestrielle Des Publications Mathematiques*, 1895 *Weyl and the Problem of Space* Julien Bernard, Carlos Lobo, 2019-10-09 This book investigates Hermann Weyl's work on the problem of space from the early 1920s onwards It presents new material and opens the philosophical problem of space anew crossing the disciplines of mathematics history of science and philosophy With a Kantian starting point Weyl asks among all the infinitely many conceivable metrical spaces which one applies to the physical world In agreement with general relativity Weyl acknowledges that the metric can quantitatively vary with the physical situation Despite this freedom Weyl deduces with group theoretical technicalities that there is only one kind of legitimate metric This construction was then decisive for the development of gauge theories Nevertheless the question of the foundations of the metric of physical theories is only a piece of a wider epistemological problem Contributing authors mark out the double trajectory that goes through Weyl's texts from natural science to philosophy and conversely always through the mediation of mathematics Readers may trace the philosophical tradition to which Weyl refers and by which he is inspired Kant Husserl Fichte Leibniz Becker etc and explore the mathematical tradition Riemann Helmholtz Lie Klein that permitted Weyl to elaborate and solve his mathematical problem of space Furthermore this volume analyzes the role of the

interlocutors with whom Weyl discussed the nature of physical space Einstein Cartan De Sitter Schrödinger Eddington This volume features the work of top specialists and will appeal to postgraduates and scholars in philosophy the history of science mathematics or physics *Revue Semestrielle Des Publications Mathématiques* ,1904 **Language and Mathematics** Marcel Danesi,2016-06-06 This book explores the many disciplinary and theoretical links between language linguistics and mathematics It examines trends in linguistics such as structuralism conceptual metaphor theory and other relevant theories to show that language and mathematics have a similar structure but differential functions even though one without the other would not exist **Annals of Mathematics** ,1927 Founded in 1884 Annals of Mathematics publishes research papers in pure mathematics *Mind* ,1893 A quarterly review of philosophy **American Journal of Mathematics** ,1916 The American Journal of Mathematics publishes research papers and articles of broad appeal covering the major areas of contemporary mathematics **The Teaching of General Mathematics in the Secondary Schools of the United States** Clarence McCormick,1929 **Quarterly Journal of Pure and Applied Mathematics** ,1906 **Significant Changes and Trends in the Teaching of Mathematics Throughout the World Since 1910** ,1929 Course of Study in Mathematics Pennsylvania.
