policy environment in particular by the opening up of emerging market economies over the past three decades and the consequent increase in international business interactions Across the different countries surveyed in Asia and Latin America the book argues that firm level innovation has been strongly influenced by capabilities that had previously been built up in a relatively closed environment However in the current more open environment it is suggested that innovation among firms also reflects differences in these national historical contexts as well as in the different forms of interaction with international business that have subsequently emerged This book is a valuable resource for academics researchers and graduate students in international business and technology management
