**Knowledge, Power, and Participation in Environmental Policy Analysis** Rob Hoppe, 2018-01-16 This volume probes practical dilemmas and competing research perspectives in environmental policy analysis. Scholars working in different fields, research traditions, societies, and policy domains offer significant insights into the processes and consequences of environmental policy making. Part 1, *Coping with Boundaries*, describes present-day conflict between experts and greater public participation in environmental policy. It shows that the institutionalization of increasingly complex environmental problems has led to a conflict between technocracy and democracy. Part 2, *The Transnational Challenge*, examines modes of cooperation between grassroots movements, scientists, and regional authorities in the United States and Canada. These and other modes of cooperation laid the foundations for the Great Lakes Water Quality Agreement, increased the effectiveness of air pollution treaties, and increased climate change. Part 3, *Bio Hazards: Policies and Paralysis*, deals with environmental problems closest to the everyday concerns of the public at large because they have immediate implications for food safety and other values. Part 4, *The Citizens Perspective*, focuses on citizen vis-à-vis environmental policy, noting that in order to make policies work, citizens must be willing and able to participate in policy making and cooperate in implementing environmental choices. Part 5, *Confronting Ordinary and Expert Knowledge*, explores opportunities and constraints affecting public participation in evaluation of science. Part 6, *Developments in Research Programming*, addresses such questions as whether scientists still have opportunities to do the research they want without being interrupted or disturbed by policy makers and other stakeholders. Part 7, *Policy Sciences Aspirations*, explores different avenues for improving environmental policy. Volume twelve in the PSRA series should inspire further investigations of the relations among knowledge, power, and participation in environmental policy. It will be of timely interest to environmentalists, policy makers, scholars, and the general public.

*Knowledge and Power*, 1966      **The Merger of Knowledge with Power** Jerome R. Ravetz, 1990      *Knowledge and Power* Sanford A. Lakoff, 1966      Essays on Educational Reformers Robert Hebert Quick, 1890      *Information, Power, and Democracy* Nico Stehr, 2015-11-12 The link between liberty and knowledge is neither static nor simple. Until recently the mutual support between knowledge, science, democracy, and emancipation was presupposed. Recently, however, the close relationship between democracy and knowledge has been viewed with skepticism. The growing societal reliance on specialized knowledge often appears to actually undermine democracy. Is it that we do not know enough, but that we know too much? What are the implications for the freedom of societies and their citizens? Does knowledge help or hinder them in unraveling the complexity of new challenges? This book systematically explores the shifting dynamics of knowledge production and the implications for the conditions and practices of freedom. It considers the growth of knowledge about knowledge and the impact of an evolving media. It argues for a revised understanding of the societal role of knowledge and presents the concept of knowledge societies as a major resource for liberty.      Critical Essays on Michel Foucault Karlis
