Manual Pocket Watches:

The Watch Repairer's Manual Henry B. Fried, 2021-01-25 As The New York Times wrote after his death Henry B. Fried was widely acknowledged as the dean of American watchmakers In the revised 1961 edition of his classic book The Watch Repairer's Manual reprinted here Fried addresses topics important to contemporary watch repairers such as self winding watches waterproofing calendar watches alarm wristwatches and chronographs The Watch Repairer's Manual also includes a fine visual dictionary of exploded views in isometric which are very helpful for ordering watch parts One of the few modern books available on the techniques of watch repair and certainly the most esteemed The Watch Repairer's Manual is outstanding for its sequence of presentation and its many useful illustrations including enlarged details of alarm and self winding watches The consummate craftsman and master of details Fried himself created the illustrations From teaching others Fried has learned that if you have a good understanding of how and why the mechanisms work you will become better at fixing any problems you face often without needing to consult a book The Watch Repairer's Manual provides Helpful background material such as full descriptions of the main divisions of the modern watch mechanisms including the purpose and function of each unit Complete directions for cleaning and overhauling a watch movement for casing A section devoted to general repairs and troubleshooting For anyone interested in watch repair this volume will serve as a working manual a reference manual and even a course of study Assuming little previous knowledge on the part of the reader Fried provides complete and clear detail on each operation The Watch Repairer's Manual should be of great value to the student hobbyist watch collector and instrument maker Henry B. Fried wrote and illustrated 14 books many pamphlets and hundreds of articles on horology the science of timepieces The first American to receive the Silver Medal of the British Horological Institute he served as president of the New York City Horological Society and the New York State Watchmakers Association and vice president of the old Horological Institute of America He taught and lectured on horology and served as an industry consultant He also was a consultant for the Random House Dictionary and the Merriam Webster Dictionary

Tascione Pocket Watch Repair Course Bob Tascione, Tascione Productions, Inc, 1996 From the Bob Tascione's web site The Tascione Pocket Watch Repair Course Great for Wrist Watches Too consists of 5 info packed videos and the course manual Pocket Watches and Why They Work This course was designed for the person who would like to learn the dying art of mechanical watch repair but doesn't have the time or funds to attend a traditional watch repair school and has discovered how difficult it is to learn from books and diagrams alone The course manual describes through the use of many detailed diagrams and simple to understand text how and why a watch works The first 3 videos and the manual have been linked through the use of an on screen timer When something is being explained in the text that might be a little difficult to understand such as escapement action I give you the exact point to fast forward to on a video to see exactly what I'm talking about This system makes sometimes difficult to understand topics unbelievably simple to learn Everything you'll need to know to do cleaning

and general repairs on a watch with a minimum of tools is in this course You ll learn in a few hours tons of hints tips and tricks that took me years to learn through trial and error Not only will you learn what to do but even more importantly I ll show you what not to do The manual even has a chapter called Business Tock for those of you who might want to take advantage of the lucrative watch repair service market This chapter shows you correct pricing techniques and work load limits You ll find tons of great close up shots throughout all 5 videos demonstrating everything from removing the movement from the case to the correct use of a staking set for many types of operations Change mainsprings cannon pinions balance staffs hairsprings and much much more I also tell you where to go for parts tools and certain specialized services One mistake can easily cost far more than this course and most of what I teach I learned through hard earned mistakes because I had no one to show me the few simple techniques that I demonstrate in these videos So if you think you might enjoy watch repair then please consider this course
