PLMN Selection

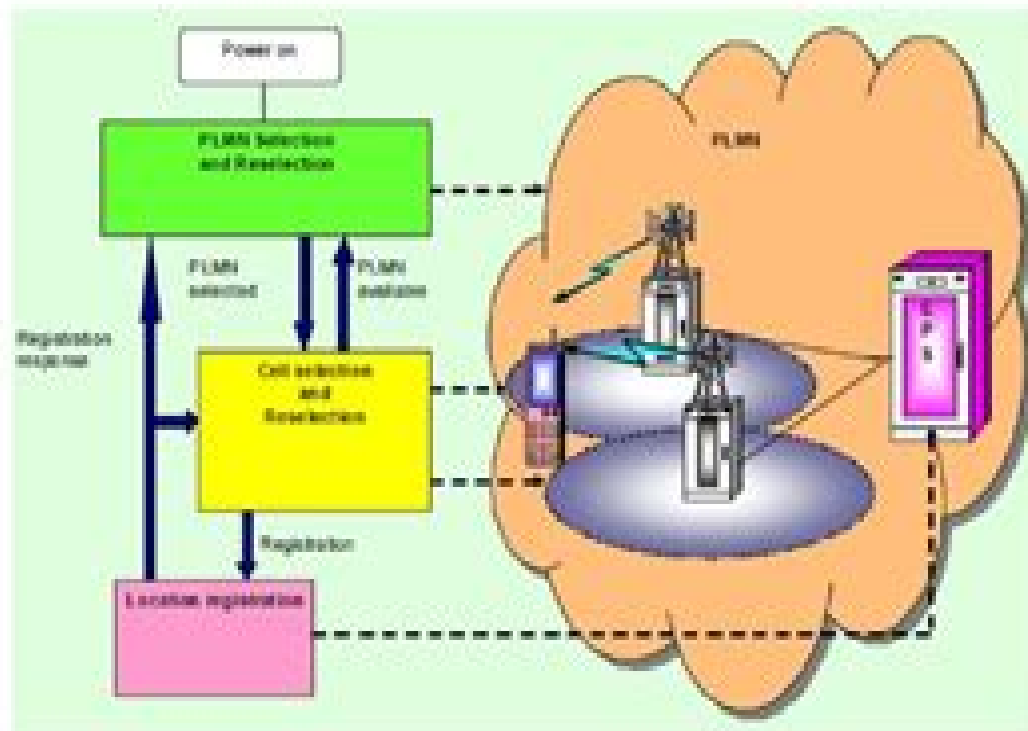

PLMN Selection

When an UE is switched on, it attempts to make contact with a PLMN. The selection of the PLMN could be either automatically or manually.

- Automatic mode: Utilizes a list of PLMN to be selected in priority order.
- Manual mode: The mobile station indicates available PLMN to the user.

Normally the UE operates on its home PLMN. At home PLMN, the MCC & MNC match with PLMN identity stored in USIM.

If the UE loses its present PLMN coverage, a new available PLMN is selected automatically or manually.
