Det. 25 Michael L. Haley MSG (Ret.) USAR,2023-01-18 When Sergeant First Class Haley and 35 other Soldiers in Detachment 25 deployed to Afghanistan on a mission to mentor the training and development of the Afghanistan National Army they did not know how chewed up the situation was Selected from volunteers within the Ninety Fifth Division the Army Reserve Drill Sergeants of Det 25 discovered that training the ANA was a joke Afghanistan was a toilet that needed to be flushed of its Taliban turds but that was never going to happen What did happen was that the entire world took a crap all over that country and left it more of a mess than it was before Operation Enduring Freedom began Nation building is a failure and the United States must never again attempt it anywhere else in the world Whenever someone tells the truth about military or political incompetence in the United States the government feigns plausible deniability or tries to suppress the truth This story tells the truth about a group of American heroes and legends who did not deserve a loss for their sacrifices Thanks to the worst president in American history the loss of American lives has become a joke Americans can only laugh about OEF because there is nothing else anyone can do now except to have faith hope and love **Seatrade** ,1984

Bradley,1999 **Telecommunications Reform in India** Rafiq Dossani,2002-05-30 Telecommunications reform in India is complete according to policymakers there They have done everything correctly in their efforts to transform a state run monopoly into an independently regulated sector in which private companies compete with government owned and operated providers And yet India lags behind nations whose telecom sectors provided comparable levels of service a decade ago What went wrong Dossani and his contributors argue that the classic textbook solutions are insufficient to produce a healthy telecom industry in India which needs to improve regulatory design introduce competition in a single phase instead of gradually implement innovative funding models and choose appropriate technologies in order to improve access to universal service Containing valuable lessons for the telecommunications industries in Mexico Indonesia the Philippines and other countries taking formerly state run industries private this book constitutes a valuable resource for policymakers regulators practitioners scholars and overseas investors Policymakers and regulators will learn that cookie cutter solutions derived from rich country experience do not always work in countries that are poor yet democratic and pro market Practitioners will be interested in the sections on universal service technology convergence and the implications for reducing costs and improving the quality of both basic telephone services and IT enabled services In particular Indian technology workers in Silicon Valley should find this book indispensable

Investors will gain valuable knowledge about this potentially huge market Scholars preconceived ideas may be nudged aside as their knowledge base is enhanced and their research agenda expanded Whereas some of the book s conclusions support current thinking such as the need to begin a sequence of reform with a regulatory system in place and the need for dominant carrier regulation other conclusions challenge the conventional wisdom Contributors make a cogent case for reformulating the balance of power between regulators and policymakers introducing competition at the local level rather than through large franchises and replacing public subsidies with cross subsidies of universal service Provides a multidisciplinary approach to understanding the problems of telecommunications reform in all their complexity *Cotton International* ,1983
