ImmunoPhysics ImmPhys and ImmunoEngineering ImmPhysEng are two cross disciplinary fields ImmPhysEng aims to unravel quantitatively the immune system function and regulation in health and disease Whereas ImmPhys study and assess the physical basis of the immune response ImmEng pursues its control and prediction Ultimately the overarching goal of these disciplines is to facilitate the development of therapeutic interventions to more precisely modulate and control the compromised immune response during diseases Lately these disciplines are becoming more popular and as such the number of publications applying physical or engineering tools to understand the immune response is increasing Nevertheless there is still no scientific forum compiling the ImmPhysEng research breakthroughs Possibly the biggest burden is to stimulate a fluent communication and syntony between a physicist or engineer and an immunologist
