Swarms, Viral Writing, and the Local Carl Whithaus, 2025-04-15 Swarms Viral Writing and the Local examines the social and rhetorical dynamics around emerging writing technologies Carl Whithaus argues that these dynamics work across networked publics as patterns of behavior and ways of interacting through and with multimodal texts This rhetorical analysis of the production and reception of born digital rhetoric shows the ongoing and evolving impacts of online public discourse that can lead to bad restaurant reviews or the subversion of democracy It is a networked process that gains significance because of the interplay and tensions between the global and the local As these texts are created distributed received and then recreated and shared again in viral ways different messages resonate across media ecologies Whithaus documents how emerging social dynamics shape and are shaped by digital writing reading and distribution technologies The New Technology Elite Vinnie Mirchandani, 2012-02-28 How to guidance for optimizing incumbent technologies to deliver a better product and gain competitive advantage Their zip codes are far from Silicon Valley Their SIC codes show retail automobile or banking But industry after industry is waking up to the opportunity of smart products and services for their increasingly tech savvy customers Traditionally technology buyers they are learning to embed technology in their products and become technology vendors In turn if you analyze Apple Google Amazon Facebook Twitter and eBay you marvel at their data centers retail stores application ecosystems global supply chains design shops They are considered consumer tech but have better technology at larger scale than most enterprises The old delineation of technology buyer and vendor is obsolete There is a new definition for the technology elite and you find them across industries and geographies The 17 case studies and 4 guest columns spread through The New Technology Elite bring out the elite attributes in detail Every organization will increasingly be benchmarked against these elite and soon will be competing against them Contrasts the productivity that Apple Google and others have demonstrated in the last decade to that of the average enterprise technology group Reveals how to leverage what companies have learned from Google Apple Amazon com and Facebook to your company s advantage Designed for business practitioners CEOs CFOs CIOs technology vendors venture capitalists IT consultants marketing executives and policy makers Other titles by Vinnie Mirchandani The New Polymath Profiles in Compound Technology Innovations If you re looking to encourage technology innovation look no further The New Technology Elite provides the building blocks your company needs to become innovative through incumbent technologies Constant Touch Jon Agar, 2013-02-07 Mobile phones are a ubiquitous technology with a fascinating history There are now as many mobile phones in the world as there are people We carry them around with us wherever we go And while we used to just speak into them now mobiles are used to do all kinds of tasks from talking to twittering from playing a game to paying a bill Jon Agar takes the mobile to pieces tracing what makes it work and puts it together again showing how it was shaped in different national contexts in the United States Europe the Far East and Africa He tells the story from the early associations with cars and the privileged through its

immense popular success to the rise of the smartphone Few scientific revolutions affect us in such a day to day way as the development of the mobile phone Jon Agar s deft history explains exactly how this revolution has come about and where it may lead in the future
