Threats to Mangrove Forests Christopher Makowski, Charles W. Finkl, 2018-04-20 This book focuses on the worldwide threats to mangrove forests and the management solutions currently being used to counteract those hazards Designed for the professional or specialist in marine science coastal zone management biology and related disciplines this work will appeal to those not only working to protect mangrove forests but also the surrounding coastal areas of all types Examples are drawn from many different geographic areas including North and South America India and Southeast Asia Subject areas covered include both human induced and natural impacts to mangroves intended or otherwise as well as the efforts being made by coastal researchers to promote restoration of these coastal fringing forests

The Quest for Professionalism Georges Romme, 2016 Early pioneers in management thinking such as Henri Fayol and Peter Drucker conceived of management as a science based professional activity that serves the greater good Today however many organizations are managed by people demonstrating anything but professionalism resulting in mismanagement of risks as well as a one dimensional focus on short term results The key thesis in this book is that The Quest for Professionalism must be revitalized because the societal costs and damage caused by managerial amateurism are huge The book is about how to address this grand challenge for example by exploring whether and how a shared professional purpose and a professional body of knowledge can be developed While most work in this area has previously focused on management education The Quest for Professionalism adopts an inside out approach implying management scholarship is the driving force behind any intrinsic transformation of the profession at large Without management scholars playing an active role in advancing science based professionalism in the mould of engineering and medicine any attempt to professionalize management practice is doomed to fail Moreover Georges Romme demonstrates the professionalization quest has to move away from the idea of management being confined to a few people at the top

toward management as a technology for distributing power and leadership throughout the organization **Antimicrobial Peptides and Complement - Maximising the Inflammatory Response** Cordula M. Stover, 2015-12-18 Antimicrobial peptides and complement are distinct components of the innate immune defence While antimicrobial peptides after cleavage of a preproprotein have the ability to insert directly in non host membranes complement requires a sequential enzymatic activation in the fluid phase in order to produce a transmembrane membrane attack complex Its insertion is controlled by membrane bound regulators Deficiencies are described for both effectors and relate to increased susceptibility of infection In addition however antimicrobial peptides and complement each influence the activity of inflammatory cells as recent data in the respective research areas shows This series of articles draws together for the entities of antimicrobial peptides and complement a balance of contributions in the areas of evolution roles functions and preclinical applications By comparing and contrasting antimicrobial peptides and complement greater cross disciplinary appreciation will be derived for their individual and overlapping spectra of activity circumstances of activation and their general ability to more completely inform the inflammatory and cellular response Conceptual Maths Peter Mattock, 2023-04-05 Written by Peter Mattock Conceptual Maths Teaching about rather than just how to do mathematics in schools aims to empower teachers to support students on a comprehensive and coherent journey through school mathematics Showcasing the best models metaphors and representations it provides excellent examples explanations and exercises that can be used across the curriculum Concepts are at the heart of the study of mathematics They are the ideas that remain constant whenever they are encountered but which combine and build upon each other to create the mathematical universe It is the structure of each concept that gives rise to the procedures that are used in calculation and problem solving and by learning about these structures a learner can make sense of how different processes work and use them flexibly as need demands In his first book Visible Maths Peter Mattock focused on the use of representations and manipulatives as images and tools and how this can provide a window into some of these mathematical structures His aim in Conceptual Maths is to go deeper beyond the procedures and to shed greater light on the structures of the subject's different concepts The book explores how a variety of visual tools and techniques can be used in the classroom to deepen pupils understanding of mathematical structures concepts and operations including number addition and subtraction multiplication and multiples division and factors proportionality functionality measures accuracy probability shape and transformation and vectors among many others In so doing Peter equips teachers with the confidence and practical know how to help learners assimilate knowledge of mathematical concepts into their schema and take their learning to the next level Containing numerous full colour diagrams and models to illustrate the conceptual takeaways and teaching techniques discussed Conceptual Maths also includes a glossary covering the key mathematical terms Suitable for teachers of maths in primary secondary and post 16 settings *The Principles of Green Energy & Technology* Surajbhan Sevdia, 2025-10-22 The Principles of Green Energy and Technology Basic Concepts to
