**The Ethics of Invention** Sheila Jasanoff, 2016-08-30 We live in a world increasingly governed by technology but to what end Technology rules us as much as laws do It shapes the legal social and ethical environments in which we act Every time we cross a street drive a car or go to the doctor we submit to the

silent power of technology Yet much of the time the influence of technology on our lives goes unchallenged by citizens and our elected representatives In *The Ethics of Invention* renowned scholar Sheila Jasanoff dissects the ways in which we delegate power to technological systems and asks how we might regain control Our embrace of novel technological pathways Jasanoff shows leads to a complex interplay among technology ethics and human rights Inventions like pesticides or GMOs can reduce hunger but can also cause unexpected harm to people and the environment Often as in the case of CFCs creating a hole in the ozone layer it takes decades before we even realize that any damage has been done Advances in biotechnology from GMOs to gene editing have given us tools to tinker with life itself leading some to worry that human dignity and even human nature are under threat But despite many reasons for caution we continue to march heedlessly into ethically troubled waters As Jasanoff ranges across these and other themes she challenges the common assumption that technology is an apolitical and amoral force Technology she masterfully demonstrates can warp the meaning of democracy and citizenship unless we carefully consider how to direct its power rather than let ourselves be shaped by it *The Ethics of Invention* makes a bold argument for a future in which societies work together in open democratic dialogue to debate not only the perils but even more the promises of technology
